PROFESSIONAL SUMMARY

Full-stack Senior Engineer with ~5 years shipping AI-integrated systems in Insurtech and Enterprise. Deep expertise in React + Go/Python backend architecture, distributed systems design, and production AI agentic pipelines. Proven ability architecting systems with AI-first mindset - from autonomous claims classification agents to LLM-based medical tourism platforms. Experienced in modernizing legacy architectures and mentoring engineers on microservices patterns. Seeking full-stack role combining product ownership with AI integration at company scaling intelligent systems.

CORE COMPETENCIES

React.js (3 yrs production)

Angular

TypeScript

Go & Python

Go-first Backend

REST API Design

AI Agent Pipelines

LLM Integration

Microservices

Distributed Systems

AWS & Docker

Kubernetes

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Full-Stack & AI-Enabled

Bengaluru

- Admissibility AI Agent - Claims Intelligence:** Architected production AI agentic system analyzing claims against configurable rules, cross-referencing damage reports with incident descriptions using ML. System classifies claims as admissible, fraudulent, document-deficient, or manual-review, reducing decisioning time at scale. Built claims handler frontend displaying AI verdict, per-rule pass/fail breakdown, and supporting evidence. Implemented contrary-action flagging so override signals feed back into retraining loop improving agent accuracy iteratively.
- RSA - Roadside Assistance Platform (React + Go/Python APIs):** Architected complete React frontend with dynamic question engine, Google Maps location handling, slot booking, and live tracking. Designed backend microservices for garage selection, eligibility logic, PII-masked phone numbers (IRDAI-compliant), and real-time status polling. Impact: App registrations 18% → 34.5% (+91%), registration time 12 min → 6 min (−50%), weekly support calls 350 → 200 (−43%). Platform scales 1000+ garage network with zero downtime deployments.
- Acko Global Care - AI Medical Tourism Platform:** Built end-to-end LLM pipeline during Ackathon 2024: LLM-based medical report analysis → optimal hospital & specialist recommendation → treatment cost estimation → best-doctor ranking. Demonstrates production AI system architecture (prompt engineering, async processing, error handling) and full-stack ownership. Placed 4th in company hackathon.
- PUD - Pickup & Drop (React + SDUI):** Owned React SDUI frontend with garage selection, dynamic pricing logic, real-time status polling. Built reusable node-based navigation patterns adopted as shared framework across RSA and PUD teams. Engineered SDUI reliability improvements and abstraction patterns increasing developer velocity 30%.
- Cross-team Architecture & Mentorship:** Led cross-team API contract discussions establishing backward-compatibility standards. Mentored junior engineers on distributed systems patterns (eventual consistency, saga orchestration). Resolved 30+ production bugs in <72hrs using rapid diagnosis and incremental releases. Delivered Claim Timeline with SLA tracking (On Time / At Risk / Breached) across claims handler workflows.

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1)

Bengaluru

- Unified Cost Management Dashboard (Angular + Python + Spring Boot):** [SDE2] Led architecture and design of enterprise dashboard serving 2000+ daily users. Built Angular + DevExtreme frontend with complex approval workflows and Layer-7 auth. Engineered Python/Spring Boot backend with Oracle query optimization (−50% latency). Impact: 50% approval-efficiency gain, \$65M ROI in FY, PCF production deployment at scale.
- Item Usage Dashboard (Flask + Angular):** [SDE2] Built TLS email engine and Flask Mail integration reducing manual process intervention by 20% across procurement teams.
- Security & DevOps Leadership:** [SDE2] Improved DevOps test coverage from 60% → 97%+. Led PCF vulnerability remediation (60-70% completion). Architected CI/CD improvements reducing deploy time and increasing reliability. Resolved 30+ portal bugs in FFv2 in rapid cycles using triage automation.

Bengaluru

- **Eye On Desktop Widget (Electron JS):** [SDE1] Built proactive monitoring tool for DevOps and Engineering teams. Reduced issue-identification response time by 35% through real-time alerts and alerting architecture.
- **Buddy Board (Angular + Python + Spring Boot):** [SDE1] Developed automated data-validation and status dashboard eliminating manual data-entry errors across procurement workflows using Python validation rules and real-time UI updates.

KEY PROJECTS & ACHIEVEMENTS

Admissibility AI Agent (Acko) 2025 · Production

End-to-end production AI system: ML classification engine + frontend display layer + feedback loop. Demonstrates AI-first architecture (prompt engineering, async task processing, error handling) integrated with full-stack product ownership.

DELL TIDE Hack2Evolve - Gen AI Patent Authorised

Gen AI system for code reusability and sustainability in enterprise environments. Shows advanced understanding of LLM applications in production software development.

DELL Supply Chain Optimisation using QUBO Advanced

Applied Adiabatic Quantum Optimisation to procurement backlog - jointly optimising Net MRP, demand forecast, and inventory. Demonstrates complex algorithmic thinking and optimization mindset.

EDUCATION

B.Tech - Computer Science 2017-2021

Sikkim Manipal Institute of Technology

CGPA: 9.69 / 10

High School Diploma - Computer Science 2013-2017

St. Columba's School, New Delhi

Grade: 9.2

ACHIEVEMENTS & CERTIFICATIONS

Patent Authorised - DELL	TIDE Hack2Evolve	2024
1st - GSCM-TECH-A-THON, DELL	Parquet Automation	2024
4th - Ackathon 2024, ACKO	Acko Global Care	2025
3rd - Code-Zen, Coding Ninjas	Competitive Coding	2019

TECHNICAL SKILLS

Frontend	Backend (Go First)	AI & ML	Cloud & DevOps	Databases & Tools	Analytics & Tools
React (3 yrs production)	Go / Golang	LLM APIs	AWS (EC2, S3, RDS)	MongoDB	Segment
Angular	Python	Gen AI Integration	Docker	PostgreSQL	Growthbook
TypeScript	Spring Boot	Prompt Engineering	Kubernetes	Oracle	Google Maps API
JavaScript	REST APIs	NLP & Rasa	CI/CD Pipelines	SQL	OAuth2 & Auth
SDUI Architecture	Microservices	ML Classification	PCF	Redis	BFF Pattern
Redux & State Mgmt	Kafka	Agentic Systems	Git & GitHub	Datadog	System Design
