PROFESSIONAL SUMMARY

Frontend Architect with ~5 years shipping React component systems and SDUI architectures at scale. Deep expertise in React, TypeScript, and modern styling frameworks (Tailwind, CSS Modules, Material UI). Proven ability designing reusable component libraries, optimizing re-render performance, and mentoring engineers on component architecture. Experienced building SDUI platforms serving 1000+ partners with excellent performance metrics. Strong grasp of state management (Redux), testing frameworks (Vitest, Playwright), and backend integration patterns (BFF, API contracts). Seeking senior frontend role building industrial-grade component systems.

CORE COMPETENCIES

React.js (3 yrs production)

TypeScript

Component Architecture

SDUI & Design Systems

Tailwind CSS

CSS Modules & Styling

Redux & State Mgmt

Performance Optimization

Vitest & Playwright

Module Federation

Kotlin/Java (Backend Navigation)

AWS & DevOps

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Full-Stack & Component Architecture

Bengaluru

- RSA Platform - React Component Architecture at Scale:** Architected and shipped React SDUI frontend serving 1000+ garage partners. Built core components: DynamicQuestionEngine, GarageSelector, SlotBooking, LiveTracking with Google Maps integration. Implemented performance optimization (memoization, lazy loading) achieving <2s initial load. Designed Redux state consistency patterns for real-time updates. Impact: App registrations +91%, signup time -50%, CES ~90%.
- SDUI Design System & Reusable Patterns:** Built server-driven UI framework with node-based navigation primitives, fallback chains, and error boundaries. Created reusable data-enricher patterns and Redux state management abstractions adopted across RSA and PUD platforms. Established component testing strategy (Vitest for unit, Playwright for e2e). Result: 40% component reuse, junior engineer onboarding -30%.
- PUD Platform - Component Performance & Bundle Optimization:** Optimized React component library for garage selection and slot booking across multiple product surfaces. Analyzed bundle sizes, implemented code splitting, reduced initial load by 35%. Built responsive design handling different viewport sizes. Mentored junior engineers on performance profiling (Chrome DevTools, React DevTools) and optimization techniques.
- CES Live Tracking & Claim Timeline UI:** Built real-time UI components using Google Maps API integration, ETA visualization, and dynamic status titles. Designed Claim Timeline with SLA indicators (On Time / At Risk / Breached) - complex state management for multi-step workflows. Implemented Growthbook feature-flag integration for safe rollouts.
- Frontend Mentorship & Code Quality:** Led code reviews establishing React best practices (hooks, composition, testing). Mentored junior engineers on component design, Redux patterns, and TypeScript. Pair-programmed on complex features (error handling, accessibility). Established frontend linting and testing standards adopted across teams.

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1)

Bengaluru

- Unified Cost Management Dashboard UI (Angular + DevExtreme):** [SDE2] Led frontend design and implementation for enterprise dashboard (2000+ daily users). Built complex approval workflows with multi-tier forms, data tables, and visualization components. Designed responsive layouts and accessibility patterns (WCAG 2.1). Optimized CSS for large datasets. Impact: 50% approval-efficiency gain.
- CSS Framework & Component Library (SDE2):** Established Angular component library with Material UI and custom styling (CSS Modules, Tailwind). Documented component API, variants, and usage guidelines. Built CSS architecture for scalability and maintainability.
- Frontend Testing & Quality (SDE1→SDE2):** [SDE1] Built Eye On Desktop Widget (Electron JS) with responsive UI for monitoring. [SDE2] Improved frontend test coverage from basic to comprehensive (unit + e2e). Established Playwright testing for critical user journeys.

KEY PROJECTS & ACHIEVEMENTS

RSA Platform - React Component System at Scale 2025 · 1000+ Partners

Architected and shipped React SDUI frontend for roadside assistance platform serving 1000+ garage partners. Demonstrates component architecture, performance optimization (–35% initial load), Redux state consistency, and mentorship. Impact: +91% adoption, –50% signup time.

SDUI Design System & Primitives Reusable · Cross-team

Built node-based navigation, data-enricher patterns, and Redux abstractions adopted across multiple platforms. Established component testing strategy (Vitest/Playwright). Demonstrates design systems thinking and component composition mastery.

Acko Global Care - AI Medical Tourism UI 2025 · 4th Place

Built responsive React UI for medical tourism recommendation engine during Ackathon 2024. Demonstrates ability translating complex AI outputs into intuitive user interfaces.

EDUCATION

B.Tech - Computer Science Sikkim Manipal Institute of Technology CGPA: 9.69 / 10	2017-2021
High School Diploma - Computer Science St. Columba's School, New Delhi Grade: 9.2	2013-2017

ACHIEVEMENTS & CERTIFICATIONS

Patent Authorised - DELL	TIDE Hack2Evolve	2024
1st - GSCM-TECH-A-THON, DELL	Parquet Automation	2024
4th - Ackathon 2024, ACKO	Acko Global Care	2025
3rd - Code-Zen, Coding Ninjas	Competitive Coding	2019

TECHNICAL SKILLS

Frontend (React)	Styling & CSS	State & Testing	Performance & Tools	Backend Navigation
React (3 yrs production)	Tailwind CSS	Redux	Code Splitting	REST API Integration
Hooks & Composition	CSS Modules	Zustand Exposure	Bundle Analysis	BFF Pattern
Component Architecture	CSS-in-JS	Vitest	Re-render Optimization	Kotlin/Java Exposure
SDUI Patterns	Styled Components	Playwright	Memoization	Spring Boot (Navigation)
TypeScript	Material UI	React Testing Library	Chrome DevTools	API Contract Understanding
JavaScript	Design Systems	E2E Testing	Webpack / Vite	OAuth2 & Auth
DevOps & Tools				
Docker				
Kubernetes				
AWS				
CI/CD Pipelines				
Growthbook				
Datadog
