PROFESSIONAL SUMMARY

Senior Backend Engineer specializing in API design and distributed systems at scale. 5 years architecting REST APIs, microservices, and cloud infrastructure at Acko and Dell. Strong track record designing public-facing API contracts (RSA/PUD BFF pattern, auto-attendance endpoints), building multi-cloud deployments (AWS, PCF), and establishing reliability standards across teams. TypeScript frontend expertise (SDUI, Redux state consistency) complements backend depth. Ready for founding-team role building identity infrastructure.

- Admissibility AI Agent:** ML-based claims classification (admissible/fraud/doc-deficient); integrated AI recommendations with handler override tracking for continuous model improvement
- Cross-team Leadership:** Mentored junior engineers on API contracts and production patterns; established shared SDUI primitives (node-based navigation, data-enricher patterns) adopted across RSA/PUD

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1)

Bengaluru

- Unified Cost Management Dashboard:** Angular + Spring Boot architecture, Layer-7 auth, \$65M ROI in FY, 50% approval-efficiency improvement, deployed on PCF
- Security & DevOps Leadership:** Improved test coverage from 60% → 97%+; led PCF vulnerability remediation (60-70% completion)
