PROFESSIONAL SUMMARY

Senior Backend Engineer with ~5 years designing and shipping production REST APIs serving millions of users. Deep expertise in distributed systems, microservices architecture, and public API contract design. Proven ability architecting authentication-adjacent systems (IRDAI-compliant PII masking, Layer-7 security) and leading cross-team standards for backward compatibility. Experienced mentoring engineers on reliability, testing strategy, and observability. Seeking founding-team role building identity platform extensions where I can own distributed systems design and establish technical standards.

CORE COMPETENCIES

REST APIs (Public)

API Contract Design

TypeScript & Node.js

Spring Boot (Java)

Python

Distributed Systems

Microservices

Reliability & Testing

Multi-cloud (AWS/Azure)

Docker & Kubernetes

Mentorship & Leadership

OAuth2 & Auth

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 - Full-Stack & API Design

Bengaluru

- REST API Design & Contracts (Multi-product):** Architected public-facing and internal REST API contracts for RSA, PUD, and Claims platforms. Established API versioning standards, backward-compatibility rules, and deprecation timelines across teams. Documented contract checklist ensuring security, reliability, and extensibility. Led code-review sessions on API contract patterns. Result: API-related production incidents -80% in mentored team.
- RSA Platform - Distributed System Architecture:** Designed and shipped microservices backing Roadside Assistance Platform: garage eligibility service, slot booking engine, live tracking coordinator, and PII-masked phone service (IRDAI-compliant). Built REST API layer serving React frontend and mobile clients. Implemented feature-flag rollout strategy with Growthbook. Impact: 1000+ garage network, app registrations +91%, reliability 99.9%.
- Admissibility AI Agent - System Design:** Architected backend microservice for AI-powered claims classification. Designed async task queue, ML model integration, and feedback loop architecture. Built API contracts between ML pipeline and frontend handlers. Implemented observability (structured logging, distributed tracing) for production monitoring.
- Multi-product Coordination & Testing Strategy:** Led cross-team integration of RSA, PUD, and CES microservices. Established testing strategy (unit → integration → e2e) and observability standards. Designed fallback strategies for service failures. Mentored junior engineers on consistency patterns (eventual consistency, saga orchestration) across services.
- Mentorship & API Standards:** Paired with junior engineers on API design, security hardening (Layer-7 auth, PII handling), and edge case testing. Established API review process and onboarded 3 new team members. Documented "API design for scale" guidelines now used company-wide.

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1)

Bengaluru

- Unified Cost Management Dashboard Backend (Spring Boot + Java):** [SDE2] Designed and shipped REST API backend for enterprise dashboard (2000+ daily users). Built Spring Boot microservice with Oracle database layer, optimized complex queries (-50% latency). Implemented Layer-7 auth for multi-tier approvals and role-based access control. Deployed on PCF with high availability. Impact: \$65M ROI in FY.
- Test Coverage & Reliability (SDE2):** Improved DevOps test coverage from 60% → 97%+. Established testing layers (unit, integration, e2e). Led PCF vulnerability remediation (60-70% completion). Built monitoring dashboards for SLA tracking.
- Distributed Systems Patterns (SDE1→SDE2 Growth):** [SDE1] Shipped Buddy Board (Angular + Python + Spring Boot) automating data validation across procurement. [SDE2] Led architecture reviews ensuring service reliability, consistency guarantees, and failover strategies across multiple services.

KEY PROJECTS & ACHIEVEMENTS

RSA Platform API Architecture 2025 · Production

Designed REST APIs for 1000+ garage network supporting real-time slot booking, location tracking, and field executive coordination. Implemented API versioning, backward-compatibility guarantees, and observability instrumentation. Demonstrates distributed systems design at scale (eventual consistency, saga orchestration).

DELL Cost Management Microservice Enterprise · \$65M ROI

Built Spring Boot REST API backend with complex authorization logic, Oracle query optimization, and PCF deployment. Demonstrates production API design, performance tuning, and security hardening in regulated environments.

API Contract Standards & Testing Cross-team

Established API design patterns, contract-first development, and testing strategy across Acko teams. Built guidelines for backward-compatibility, versioning, and deprecation. Mentored 3+ engineers on reliability-first API design.

EDUCATION

B.Tech - Computer Science Sikkim Manipal Institute of Technology CGPA: 9.69 / 10	2017-2021
High School Diploma - Computer Science St. Columba's School, New Delhi Grade: 9.2	2013-2017

ACHIEVEMENTS & CERTIFICATIONS

Patent Authorised - DELL	TIDE Hack2Evolve	2024
1st - GSCM-TECH-A-THON, DELL	Parquet Automation	2024
4th - Ackathon 2024, ACKO	Acko Global Care	2025
3rd - Code-Zen, Coding Ninjas	Competitive Coding	2019

TECHNICAL SKILLS

Languages	APIs & Protocols	Distributed Systems	Cloud & DevOps	Databases	Testing & Reliability
Java & Spring Boot	REST APIs	Microservices	AWS (RDS, EC2)	MongoDB	Unit Testing
TypeScript	OAuth2 & Auth	Event-driven Arch	Azure Exposure	PostgreSQL	Integration Tests
Node.js	API Versioning	Message Queues	Docker	Oracle	E2E Testing
Python	API Contracts	Consistency Patterns	Kubernetes	Redis	Load Testing
JavaScript	BFF Pattern	Saga Orchestration	PCF	Query Optimization	Datadog & Monitoring
SQL	GraphQL (Exposure)	Failover Strategies	CI/CD	Schema Design	Observability
