PROFESSIONAL SUMMARY

Full-stack Senior Engineer with ~5 years of end-to-end product ownership in Insurtech and Enterprise tech. Deep expertise in React and Node.js/Python backend architecture, SDUI component-first design, and production API contracts. Proven track record architecting and shipping scalable systems - from doubling insurance app registrations (+91%) to designing reusable framework patterns adopted across product teams. Seeking full-stack senior role at high-growth product companies where I can own complete features from API design through production monitoring.

CORE COMPETENCIES

React.js (3 yrs production)

Next.js (SSR)

TypeScript

Python & Go

REST API Design

SDUI Architecture

Redux & State Management

BFF Pattern

Microservices

AWS & Docker

Kubernetes & CI/CD

Module Federation

WORK EXPERIENCE

Acko General Insurance

Jan 2025 - Present

Software Development Engineer 2 · Full-Stack & AI-Enabled

Bengaluru

- RSA - Roadside Assistance Platform (React + SDUI):** Architected complete React SDUI frontend with dynamic question engine, Google Maps location handling, slot booking, and live tracking. Engineered backend APIs for garage selection, eligibility logic, and PII-masked phone numbers (IRDAI-compliant). Impact: App registrations 18% → 34.5% (+91%), registration time 12 min → 6 min (–50%), weekly support calls 350 → 200 (–43%). Platform serves 1000+ garage network. Built Advisor Portal for ops team to manage bookings, track field executives, and handle end-to-end RSA requests.
- Admissibility AI Agent - Claims Intelligence:** Architected production AI agentic system analyzing claim parameters against configurable rules using ML. Owned complete claims handler frontend displaying AI verdict, per-rule pass/fail breakdown, and supporting evidence. Implemented contrary-action flagging - when handlers override AI recommendations, signals feed back to retrain and improve agent accuracy over time. System classifies claims as admissible, fraudulent, document-deficient, or manual-review, reducing decisioning time at scale.
- PUD - Pickup & Drop (1000+ Garages, SDUI / React):** Owned SDUI config-driven PUD frontend with garage selection, dynamic bias (ADSC vs non-ADSC), pricing logic by pin code, and real-time status polling. Built reusable node-based navigation and data-enricher patterns adopted as shared primitives across RSA and PUD platforms.
- CES Live Tracking & Claim Timeline:** Built real-time field-executive tracking UI using Google Maps + Distance Matrix API integration, ETA visualization, and dynamic status titles. Delivered Claim Timeline with SLA tags (On Time / At Risk / Breached), task-history navigation, IST date formatting - adopted across all claim-handler workflows.
- Cross-team & Mentorship:** Mentored junior engineers on API contract design and production patterns; led API contract discussions establishing shared standards across teams. Stabilised Self PI flow with fallbacks, re-upload handling, and Segment tracking (completion 70-72%). Delivered Vahan status, cancelled-policy display, and WhatsApp communication flows. Implemented auto-attendance tracking APIs for Claims handlers with DB config for timeline event mapping.

Dell Technologies

Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1)

Bengaluru

- Unified Cost Management Dashboard (Angular + Spring Boot):** [SDE2] Led end-to-end design and architecture of enterprise dashboard serving 2000+ daily users across 60+ business units. Built Angular + DevExtreme frontend with complex approval workflows, multi-tier auth (Layer-7), and data aggregation backend using Spring Boot. Engineered Oracle query optimization reducing response time 50%. Impact: 50% approval-efficiency gain, \$65M ROI in FY, PCF production deployment.
- Item Usage Dashboard (Flask + Angular):** [SDE2] Built TLS email engine and Flask Mail integration reducing manual process intervention by 20%.
- Security & DevOps Leadership:** [SDE2] Improved DevOps test coverage from 60% → 97%+. Led PCF vulnerability remediation (60-70% completion). Resolved 30+ portal bugs in FFv2 in 3-4 days using rapid triage and release cycles.

Bengaluru

- **Eye On Desktop Widget (Electron JS):** [SDE1] Built proactive monitoring tool for DevOps and Engineering teams. Reduced issue-identification response time by 35% through real-time alerts and dashboard visibility.
- **Buddy Board (Angular + Python + Spring Boot):** [SDE1] Developed automated data-validation and status dashboard for DISCP procurement workflows. Eliminated manual data-entry errors across team processes using Python validation rules and real-time UI updates.

KEY PROJECTS & ACHIEVEMENTS

Acko Global Care - AI Medical Tourism Platform 2025 · 4th Place

Built end-to-end LLM pipeline during Ackathon 2024 (internal hackathon): LLM-based diagnosis extraction from medical reports → optimal hospital & specialist recommendation → treatment cost estimation → best-doctor ranking. Demonstrates production AI system architecture, prompt engineering, and end-to-end product thinking.

DELL Supply Chain Optimisation using QUBO Advanced

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory - significantly reducing associated logistics costs and improving supply chain efficiency.

Speech-to-Sign Language Translator University

End-to-end system interpreting grammatical sentence structure for precise Sign Language output - from speech recognition to gesture sequence mapping.

EDUCATION

B.Tech - Computer Science 2017-2021

Sikkim Manipal Institute of Technology

CGPA: 9.69 / 10

High School Diploma - Computer Science 2013-2017

St. Columba's School, New Delhi

Grade: 9.2

ACHIEVEMENTS & CERTIFICATIONS

Patent Authorised - DELL	TIDE Hack2Evolve	2024
1st - GSCM-TECH-A-THON, DELL	Parquet Automation	2024
4th - Ackathon 2024, ACKO	Acko Global Care	2025
3rd - Code-Zen, Coding Ninjas	Competitive Coding	2019

TECHNICAL SKILLS

Frontend	Styling & UI	Backend & APIs	Cloud & DevOps	Databases & Tools	Architecture & AI
React (3 yrs production)	CSS Modules	REST APIs	AWS	MongoDB	Module Federation
Next.js (SSR/SSG)	CSS-in-JS	Spring Boot	Docker	Oracle	SDUI & BFF
Angular	Tailwind CSS	Python	Kubernetes	SQL	Gen AI & LLMs
TypeScript	Styled Components	Node.js	PCF	Segment	Prompt Engineering
JavaScript	Material UI	BFF Pattern	CI/CD	Growthbook	NLP & Rasa
Redux	Design Systems	Microservices	Git	Google Maps API	Datadog
SDUI Architecture
