

Stevens Philip

Senior Full Stack Engineer · React + TypeScript + Node.js · Execution Speed + Quality

✉ stevensp99@gmail.com · 📞 9380546501 · [linkedin.com/in/stevens-philip](#) · [stevens-philip-portfolio.vercel.app](#) · Bengaluru, India

PROFESSIONAL SUMMARY

- Full-stack engineer with 5 years building scalable systems using React, TypeScript, and Node.js. Proven execution speed: shipped RSA platform with +91% registration lift in 2-3 months. Strong in microservices architecture, performance optimization, and AI-assisted development (GitHub Copilot, LLM APIs). Led cross-team collaboration, established API contracts, mentored junior engineers. Comfortable with technical ambiguity, thrive on shipping quality features fast, and leverage modern AI tooling to enhance team productivity.

CORE COMPETENCIES

React (3+ yrs)

TypeScript

Node.js

JavaScript (ES6+)

Microservices

REST APIs

Distributed Systems

Performance Optimization

GitHub Copilot

LLM APIs

AI Integration

DevOps & CI/CD

WORK EXPERIENCE

Software Development Engineer 2 · Full-Stack & AI-Enabled

Jan 2025 - Present

Acko General Insurance · Bengaluru

- End-to-end fullstack ownership across RSA, PUD, Claims platforms. React frontend + Node.js/Python backend APIs. Responsible for feature delivery, microservices coordination, mentorship across distributed teams.

RSA - Roadside Assistance Platform (React + Node.js APIs)

- Built complete RSA frontend (React/TypeScript): dynamic question engine, slot booking, Google Maps location, garage selection, real-time tracking, CES updates. Coordinated backend API design with Spring Boot teams.
- Impact: App registrations 18% → 34.5% (+91%), registration time 12 min → 6 min (−50%), weekly support calls 350 → 200 (−43%). Shipped end-to-end feature in 2-3 months.
- Built Advisor Portal (internal ops tool): job status management, live field-executive tracking, RSA request coordination. Engineered pit/flood routing logic, PII-masked phone numbers, Segment analytics, Growthbook feature flags.

PUD - Pickup & Drop (1,000+ Garages, React + Node APIs)

- Owned PUD frontend: garage selection with dynamic steering, slot booking, free/paid pricing by pin code, real-time status polling with exponential backoff. Handled 1000+ garage data points with virtualized lists, <200ms render times.
- Designed reusable SDUI node-based navigation and data-enricher patterns; coordinated API contracts with backend teams. Result: independent team deployment, zero integration blockers, 90%+ library adoption.

Claims Intelligence & Real-Time Tracking

- Built Admissibility AI Agent frontend: React display layer for AI verdicts (admissible/fraudulent/document-deficient), per-rule pass/fail breakdown, supporting evidence, handler overrides feeding back into model retraining.
- Delivered Claims Timeline & Audit Trail: SLA tags, task-history navigation, IST formatting adopted across claim workflows. Real-time field tracking with Google Maps, Distance Matrix API, dynamic status titles, feature-flag rollouts.

Acko Global Care - AI Medical Tourism Platform (4th Place Ackathon)

- Built AI-powered medical tourism platform: LLM-based diagnosis extraction from medical reports, optimal hospital/specialist recommendation, treatment cost estimation, best-doctor ranking. React frontend + Python LLM backend, end-to-end.

Software Engineer 2 (Promoted SDE1)

Feb 2023 - Jan 2025

Dell Technologies · Bengaluru

- Built React/Angular + Spring Boot enterprise systems; led security & DevOps: test coverage 60% → 97%+, PCF vulnerability remediation 60-70%.

Unified Cost Management Dashboard

- Designed React frontend for procurement approval workflows; coordinated with Spring Boot backend on REST API contracts; implemented real-time data binding, approval process visualizations, audit trails. Impact: 50% approval-efficiency gain, \$65M ROI in FY.

DevOps + Quality Leadership

- Led systematic test coverage investment (unit + integration + E2E), automated CI/CD, established code review standards. Mentored team on testing discipline. Result: 97% coverage, confident deploys, zero critical incidents.

Software Engineer 1

Aug 2021 - Feb 2023

Dell Technologies · Bengaluru

- Built Eye On Desktop Widget (Electron JS): proactive monitoring tool reducing issue-identification response time 35%. Shipped Buddy Board (Angular + Python + Spring Boot): automated data-validation dashboard eliminating manual errors.

Software Engineer Intern · AI-Enabled

Feb 2021 - May 2021

Dell Technologies · Bengaluru

- Architected PRISMO & DISCP AI Chatbot (Rasa NLP, wake-word detection): containerized with Docker & Kubernetes, 20% efficiency gain. Built Speech Recognition Engine with custom domain model: 85% accuracy on DELL abbreviations.

KEY PROJECTS & TECHNICAL DEPTH

Execution Speed + Shipping Quality

- **RSA Feature Shipping:** +91% registrations in 2-3 months. Own problem statement → design → prototype → production + mentorship of fast-followers. Comfortable with timeline pressure, high quality bar simultaneously.
- **DevOps Investment at Scale:** Drove test coverage 60%→97% at Dell through systematic investment. Automated CI/CD, established code review checklist, mentored team on testing discipline. Result: confident deploys, zero critical incidents.

Fullstack Microservices Architecture

- **API Contract Design:** Established contract standards across Acko teams (versioning, error handling, pagination, SLA 24h response). Led API design meetings, documented patterns, mentored on contract-first development. Result: independent team shipping, zero blockers.
- **Microservices Coordination:** RSA, PUD, Claims teams with independent deployments. Designed frontend-backend boundaries (SDUI pattern) enabling async team shipping. Coordinated API evolution across 3+ teams without blocking.

Performance Optimization at Scale

- **Real-time System Performance:** PUD platform with 1000+ garages: virtualized lists, lazy-loaded sections, optimized polling (exponential backoff), Redux with selectors + memoization. Result: <200ms render time, confident deploys, zero lag.
- **SDUI Architecture:** Server-driven UI pattern: backend owns flow logic as config, frontend renders dynamically. Eliminates tight coupling, enables rapid product iteration. Reusable primitives (node-nav, data-enrichers) adopted by 3 platforms.

AI Integration & Modern Tooling

- **Production LLM Features:** Admissibility Agent (claim classification), Acko Global Care (medical tourism). Established patterns for AI reliability: fallbacks, monitoring, feature flags, safe rollouts. Mentored teams on AI-specific testing.
- **AI-Assisted Development:** GitHub Copilot integration, LLM API patterns, prompt engineering discipline. Comfortable shipping AI-first features and mentoring teams on modern tooling.

Mentorship & Cross-Team Collaboration

- **Mentored juniors on:** RSA fast-follower features, PUD garage logic, component architecture, performance optimization, testing discipline. Led code review standards across teams.
- **Cross-team coordination:** Established API contracts, async communication patterns, clear governance. Comfortable working with distributed teams, async workflows, and async culture.

TECHNICAL SKILLS

Frontend	React (3+ yrs production), TypeScript, JavaScript (ES6+), SCSS, Sass, CSS Modules, CSS-in-JS, Tailwind CSS, Styled Components, Material UI, Design Systems, Next.js
Backend	Node.js, Spring Boot, Python, REST API design, Microservices architecture, BFF Pattern, API contract standards
Architecture	SDUI (Server-Driven UI), Distributed Systems, Microservices, Performance optimization, State management (Redux), Component architecture, Scalability patterns
DevOps & Cloud	Docker, Kubernetes, AWS, PCF, CI/CD, Git, GitHub, testing infrastructure, code quality automation
AI / Modern Tooling	GitHub Copilot, LLM APIs, Gen AI, Prompt Engineering, NLP (Rasa), Production AI patterns, AI testing
Databases & Tools	MongoDB, Oracle, SQL, Segment, Growthbook, Datadog, Google Maps API, JIRA, Figma, Feature flags

EDUCATION & ACHIEVEMENTS

B.Tech - Computer Science

Sikkim Manipal Institute of Technology
2017 - 2021 · CGPA: 9.69 / 10

High School Diploma - Computer Science

St. Columba's School, New Delhi
2013 - 2017 · Grade: 9.2

- ✓ Patent Authorised - DELL: TIDE Hack2Evolve - Gen AI for Code Reusability & Sustainability
- ✓ 1st - GSCM-TECH-A-THON, DELL: Parquet automation: 8 hrs → 2 min for large data files
- ✓ 4th - Ackathon 2024, ACKO (Jan 2025): Acko Global Care - AI-powered medical tourism platform
- ✓ 3rd - Code-Zen, Coding Ninjas: Competitive coding, Tech ADRISHTA '19
- ✓ 3rd - Hackathon v1.0, HackerEarth: C++ String Eliminator game, 33 teams
- ✓ Debashish Chatterjee Award: Highest marks in Computer Science
