PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with ~5 years shipping Java/React enterprise-scale applications in Insurtech and Fortune 500 environments. Deep expertise in Spring Boot microservices, React SDUI architecture, and end-to-end product ownership. Proven track record architecting systems at enterprise scale - from \$65M ROI dashboards to platforms serving 1000+ partners. Strong leadership and mentorship capabilities with demonstrated ability establishing technical standards across teams. Seeking full-stack role at enterprise scale where I can own complete systems, mentor engineers, and drive architectural excellence.

CORE COMPETENCIES

Java & Spring Boot (4 yrs)

React.js (3 yrs production)

TypeScript

REST API Design

Microservices

Distributed Systems

SDUI Architecture

Kafka & Message Queues

AWS & Docker

Kubernetes & CI/CD

Observability & Monitoring

Mentorship & Leadership

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 - Full-Stack & Enterprise Scale

Bengaluru

- RSA Platform - Full-Stack Ownership at Enterprise Scale:** Architected and shipped complete platform (React frontend + Spring Boot backend) serving 1000+ garage partners. Designed REST API layer with backward-compatible versioning, PII-masked phone numbers (IRDAI-compliant), and Layer-7 auth. Built React SDUI frontend with dynamic question engine, slot booking, and real-time tracking. Mentored cross-functional teams on API contracts and production readiness. Impact: App registrations 18% → 34.5% (+91%), registration time 12 min → 6 min, 1000+ partner network with 99.9% reliability.
- Claims Processing - AI Agent + Observability:** Architected Admissibility AI Agent: ML classification backend (Spring Boot microservice) + claims handler frontend (React). Designed observability (Datadog, structured logging, distributed tracing). Implemented feedback loop architecture so handler override signals retrain ML model. Reduced claims decisioning time and improved audit consistency at scale.
- PUD Platform - Scalable Microservices Design:** Designed garage selection and slot booking microservices with event-driven architecture (Kafka). Built React SDUI frontend with Redux state management. Engineered reusable components adopted across platforms. Established API standards and mentored teams on reliability patterns (circuit breakers, retries, fallbacks).
- Cross-team Architecture & Mentorship:** Led API contract discussions establishing backward-compatibility standards and versioning strategy. Mentored 3+ engineers on microservices design, testing strategy (unit → integration → e2e), and production observability. Pair-programmed on critical features. Documented architectural decisions and patterns. Result: API incidents -80% in mentored teams, onboarding time -30%.

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1)

Bengaluru

- Unified Cost Management Dashboard (Spring Boot + Angular):** [SDE2] Architected and shipped enterprise dashboard for 2000+ daily users across 60+ business units. Built Spring Boot REST API backend with Oracle database, query optimization (-50% latency), and multi-tier authorization (Layer-7 auth). Designed Angular frontend with DevExtreme for complex approval workflows and data visualization. Deployed on PCF with monitoring and SLA tracking. Impact: 50% approval-efficiency gain, \$65M ROI in FY.
- DevOps & Reliability Leadership:** [SDE2] Improved test coverage from 60% → 97%+. Led PCF vulnerability remediation (60-70% completion). Established CI/CD practices reducing deploy time and increasing reliability. Built observability dashboards for SLA tracking. Established testing standards (unit, integration, e2e) across teams.
- Item Usage Dashboard (Python + Spring Boot + Angular):** [SDE2] Built Flask Mail TLS engine + Angular UI reducing manual process intervention by 20%. Demonstrates full-stack ownership and process automation mindset.
- SDE1 Growth - Building Foundations:** [SDE1] Shipped Eye On Desktop Widget (Electron JS, real-time monitoring). Built Buddy Board (Angular + Python + Spring Boot) automating data validation. Learned distributed systems fundamentals, testing strategy, and production readiness.

KEY PROJECTS & ACHIEVEMENTS

RSA Platform - Full-Stack at Enterprise Scale 2025 · ₹1000+ Network

Architected complete platform (Spring Boot + React) serving 1000+ garage partners with 99.9% reliability. Demonstrates full-stack ownership, microservices design, mentorship, and impact at scale. Impact: +91% adoption, -50% signup time, -43% support load.

DELL Cost Management - Enterprise Dashboard \$65M ROI · 2000+ Users

Built Spring Boot backend with optimized Oracle queries and Angular frontend for 2000+ daily users across enterprise. Demonstrates enterprise-scale system design, performance optimization, and business impact.

Admissibility AI Agent - Production ML Integration 2025 · Claims Domain

Architected Spring Boot microservice integrating ML classification with claims processing workflow. Built React frontend for claims handlers. Demonstrates AI integration, observability design, and domain expertise.

EDUCATION

B.Tech - Computer Science Sikkim Manipal Institute of Technology CGPA: 9.69 / 10	2017-2021
High School Diploma - Computer Science St. Columba's School, New Delhi Grade: 9.2	2013-2017

ACHIEVEMENTS & CERTIFICATIONS

Patent Authorised - DELL	TIDE Hack2Evolve	2024
1st - GSCM-TECH-A-THON, DELL	Parquet Automation	2024
4th - Ackathon 2024, ACKO	Acko Global Care	2025
3rd - Code-Zen, Coding Ninjas	Competitive Coding	2019

TECHNICAL SKILLS

Backend (Java First)	Frontend (React)	Databases & Storage	Messaging & Events	Cloud & DevOps
Java & Spring Boot (4 yrs)	React (3 yrs production)	Oracle (4 yrs)	Kafka	AWS (RDS, EC2, S3)
REST API Design	TypeScript	SQL	Event-driven Architecture	Docker
Microservices	Redux	MongoDB	Message Queues	Kubernetes
Spring Data JPA	SDUI Architecture	PostgreSQL	Async Processing	PCF
Spring Security	Tailwind CSS	Redis	Saga Orchestration	CI/CD Pipelines
Maven & Gradle	Angular (2+ yrs)	Query Optimization	Eventual Consistency	Git & GitHub
Observability & Tools				
Datadog Monitoring				
Structured Logging				
Distributed Tracing				
Segment Analytics				
Growthbook				
SLA Tracking
