PROFESSIONAL SUMMARY

Full-stack engineer with ~5 years building AI/agent systems and production LLM pipelines. At Acko, architected the Admissibility AI Agent -- an end-to-end agentic pipeline with configurable rule classification, evidence extraction, and human-override feedback loop into model retraining -- directly analogous to AI-driven contract lifecycle automation. Built LLM pipelines for medical report extraction and recommendation ranking (Acko Global Care). At Dell: production NLP chatbot (Rasa, Docker/K8s), custom speech recognition engine (85% accuracy), and an authorised GenAI patent. Strong Java/Python backend + React/TypeScript full-stack, AWS/Docker/Kubernetes. Targeting AI/agent engineering roles where I can own multi-step reasoning pipelines end-to-end.

CORE COMPETENCIES

AI Agent Pipelines & Multi-Step Reasoning

LLM APIs (OpenAI / Anthropic Claude)

Python & Flask (Backend)

Java & Spring Boot (REST APIs)

Agentic Workflow Automation

NLP & Prompt Engineering

AWS, Docker & Kubernetes

CI/CD & Microservices

React.js & TypeScript

HITL Feedback Loops & Retraining

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 · Bengaluru

- Admissibility AI Agent -- Agentic CLM-Parallel Pipeline:** Architected an agentic system classifying insurance claims as admissible, fraudulent, document-deficient, or manual-review -- a configurable rules engine cross-referencing damage reports with incident descriptions using ML. Built React frontend: AI verdict display, per-rule pass/fail breakdown, supporting evidence, contra-action flagging. Handler overrides feed back into the model retraining loop -- a closed HITL feedback cycle directly analogous to AI-driven contract lifecycle automation.
- Acko Global Care -- LLM Pipeline (Hackathon, 4th Place):** Built end-to-end LLM pipeline: LLM-based diagnosis extraction from medical reports → optimal hospital & specialist recommendation → treatment cost estimation → best-doctor ranking. Full AI orchestration from prompt design to output ranking.
- RSA -- Full-Stack Product Ownership (React + Spring Boot):** Owned complete RSA platform: SDUI frontend, slot booking, Google Maps, live tracking, and Advisor Portal. Impact: App registrations +91%, registration time -50%, support calls -43%.
- IRDAI-Compliant Data Handling & API Design:** PII-masked phone numbers, RBAC-controlled sensitive data access across RSA, PUD, and CES. Spring Boot BFF layer aggregating multi-source APIs. Cross-team API contract design across 4 product lines.

Dell Technologies Aug 2021 -- Jan 2025

Software Engineer · SDE1 → SDE2 (Promoted) · Bengaluru

- AI Chatbot & Speech Recognition (Rasa NLP, Docker, Kubernetes) [Intern→SDE1]:** Containerised NLP chatbot with wake-word detection deployed on Docker/Kubernetes -- 20% interaction efficiency gain. Custom speech recognition engine tuned for Dell abbreviations: 85% accuracy in production.
- Security & DevOps Lead -- CI/CD & PCF Vulnerability Remediation [SDE2]:** PCF vulnerability remediation: 60--70% CVEs resolved. DevOps coverage: 60%→97%. GitHub Actions + Jenkins; Docker and Kubernetes for containerised deployments.
- Unified Cost Management Dashboard (Angular + Spring Boot + Layer-7 Auth) [SDE2]:** Full-stack enterprise admin on PCF -- Layer-7 auth (enterprise SSO), RBAC (approver/viewer/admin). 50% approval-efficiency gain, \$65M ROI in FY.
- GenAI Patent -- TIDE Hack2Evolve [SDE2]:** Authorised patent for Gen AI for Code Reusability & Sustainability at Dell's internal innovation programme.
- Eye On Desktop Widget & Buddy Board [SDE1]:** Electron JS monitoring tool (-35% response time); Angular + Python + Spring Boot data-validation dashboard for DISCP procurement.

Bharat Electronics Limited Dec 2019 -- Jan 2020

SDE Winter Intern · Ghaziabad

- Radar Console Displays for multi-object tracking -- trajectory, distance, and bearing calculations using Qt IDE.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence AI / Production

Agentic classification pipeline with configurable rule engine, per-rule evidence extraction, contra-action flagging, and HITL feedback loop into model retraining. End-to-end ownership from API contract to production rollout.

Acko Global Care -- LLM Medical Platform Hackathon · 4th Place

LLM-based diagnosis extraction from medical reports → hospital & specialist recommendation → treatment cost estimation → best-doctor ranking. End-to-end AI pipeline from prompt engineering to output ranking.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology	2017 -- 2021
CGPA: 9.69 / 10	
High School Diploma -- Computer Science · St. Columba's School, New Delhi	2013 -- 2017
Grade: 9.2	

ACHIEVEMENTS

Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability
1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min
4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform
Debashish Chatterjee Award · Highest marks in Computer Science

TECHNICAL SKILLS

AI / ML: Gen AI, LLM APIs (OpenAI, Anthropic Claude), Rasa NLP, Prompt Engineering, AI Agent Pipelines, HITL Feedback Loops
Backend: Java, Spring Boot (REST APIs, Layer-7 Auth), Python (Flask, Rasa NLP), Node.js
Frontend: React.js, Next.js (SSR/SSG), Angular (3 yrs), TypeScript, JavaScript ES6+, SCSS, Tailwind CSS, Redux, Material UI
Cloud & DevOps: AWS, Docker, Kubernetes, PCF, CI/CD (GitHub Actions, Jenkins), Git **Databases:** MongoDB, Oracle, SQL
Analytics & Observability: Datadog (production, Acko), Segment, Growthbook
