PROFESSIONAL SUMMARY

Full-stack SDE2 with ~5 years of technical leadership, system design ownership, and end-to-end product delivery. At Acko, led API contract design across 3 product lines (RSA, PUD, CES), drove high-level and low-level design decisions, and mentored junior engineers on feature delivery and architecture. Measurable impact: +91% app registrations on RSA, 1,000+ garages on PUD. At Dell, promoted from SDE1 to SDE2 with Security & DevOps Lead responsibilities across two product lines -- CI/CD ownership, vulnerability remediation, and \$65M ROI enterprise system delivery. Strong full-stack depth: React/Angular + Java/Spring Boot + microservices. Targeting Lead Software Engineer roles at large-scale, data-driven product companies.

CORE COMPETENCIES

Technical Leadership & System Design

Full-Stack Engineering (React + Java)

High-Level & Low-Level Design

Cross-Team API Contract Ownership

Junior Engineer Mentoring

React.js & Angular (3 yrs)

Java & Spring Boot (REST APIs)

Microservices & Data-Driven Apps

CI/CD & DevOps

Docker, Kubernetes & AWS

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 · Bengaluru

- Technical Leadership -- API Contract Design & System Architecture:** Led high-level design and API contract standardisation across RSA, PUD, and platform teams before backend implementation. Drove cross-team code reviews, mentored junior engineers on RSA fast-follower features and PUD garage logic. Resolved 30+ portal bugs in FFv2 in 3--4 days.
- RSA -- Data-Driven Platform Ownership (React + Spring Boot):** Owned complete RSA system design and delivery: dynamic question engine, slot booking, Google Maps, garage selection, live tracking, and Advisor Portal for ops agents. Impact: App registrations +91%, registration time -50%, support calls -43%. CES ~90%.
- PUD -- Architecture & Garage Platform (1,000+ Garages):** Designed and delivered config-driven SDUI PUD frontend: garage selection, slot booking with dynamic pricing, real-time polling. Built reusable node-based navigation and data-enricher patterns adopted as shared primitives across product lines.
- Admissibility AI Agent -- System Design & Delivery:** Architected end-to-end agentic classification system: ML rules engine, React frontend (AI verdict, evidence, HITL override), feedback loop into model retraining.
- Spring Boot BFF & IRDAI Compliance:** BFF layer aggregating multi-source APIs. PII-masked data flows (IRDAI-compliant), RBAC across all claim and user data, Datadog observability, AWS-deployed microservices.

Dell Technologies Aug 2021 -- Jan 2025

Software Engineer · SDE1 → SDE2 (Promoted) · Bengaluru

- Technical Lead -- Security & DevOps, DISCP & One Cost [SDE2]:** Owned security posture and CI/CD infrastructure across two product lines. PCF vulnerability remediation: 60--70% CVEs resolved. Pipeline coverage: 60%→97%. GitHub Actions + Jenkins; Docker and Kubernetes deployments.
- Unified Cost Management Dashboard -- System Design & Delivery [SDE2]:** Full-stack enterprise admin on PCF -- Angular frontend, Spring Boot REST APIs, Layer-7 auth (enterprise SSO), RBAC (approver/viewer/admin). 50% approval-efficiency gain, \$65M ROI in FY.
- Eye On Desktop, Buddy Board & Item Usage Dashboard [SDE1/SDE2]:** Electron JS monitoring (~35% response time); Angular + Spring Boot data-validation dashboard; Flask REST backend + TLS email engine (~20% manual intervention).
- AI Chatbot & Speech Recognition [Intern]:** Containerised Rasa NLP chatbot on Docker/Kubernetes -- 20% efficiency; custom speech recognition: 85% accuracy.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence AI / Production

End-to-end agentic classification pipeline: configurable rule engine, per-rule evidence display, HITL override feedback loop. System design, API contracts, and production delivery owned end-to-end.

DELL Supply Chain Optimisation using QUBO Quantum Computing

Adiabatic Quantum Optimisation applied to procurement backlog -- jointly optimising Net MRP, demand forecast, and inventory to reduce logistics costs.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology	2017 -- 2021
CGPA: 9.69 / 10	
High School Diploma -- Computer Science · St. Columba's School, New Delhi	2013 -- 2017
Grade: 9.2	

ACHIEVEMENTS

- Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability
- 1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min
- 4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform
- Debashish Chatterjee Award · Highest marks in Computer Science

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG), Angular (3 yrs), TypeScript, JavaScript ES6+, SCSS, Tailwind CSS, Redux, Material UI, Design Systems

SDUI & Architecture: Server-Driven UI (React + Angular), BFF Pattern, Module Federation Micro-Frontends, Microservices, REST APIs

Backend: Java, Spring Boot (REST APIs, Layer-7 Auth, PCF), Python (Flask, Rasa NLP), Node.js

Cloud & DevOps: AWS, Docker, Kubernetes, PCF, CI/CD (GitHub Actions, Jenkins), Git

AI / ML: Gen AI, LLM APIs, Rasa NLP, Prompt Engineering, AI Agent Pipelines **Databases:** MongoDB, Oracle, SQL

Analytics & Observability: Datadog (production, Acko), Segment, Growthbook
