PROFESSIONAL SUMMARY

Full-stack SDE2 with ~5 years owning end-to-end technical delivery -- from HLD through production rollout -- across Java/Spring Boot, Python, and Node.js backends and React/Angular frontends. At Acko, led API contract design across 4 product lines (RSA, PUD, CES, Claims), drove system design decisions independently, and mentored junior engineers on architecture and delivery. Measurable impact: +91% app registrations on RSA, \$65M ROI enterprise dashboard at Dell. Deep backend experience -- Java/Spring Boot, Python Flask, Node.js, MongoDB, PostgreSQL -- with Docker/Kubernetes and CI/CD ownership. Targeting SDE 3 roles at product-led SaaS organisations.

CORE COMPETENCIES

Java & Spring Boot (Backend APIs)

Python & Node.js

HLD & LLD Ownership

End-to-End Technical Delivery

MongoDB & PostgreSQL at Scale

Docker & Kubernetes

CI/CD (GitHub Actions, Jenkins)

Junior Engineer Coaching

AWS & Cloud Deployments

Cross-Team API Contract Design

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 · Bengaluru

- HLD/LLD & End-to-End Delivery -- RSA, PUD, CES, Claims:** Independently owned system design (HLD and LLD) and production delivery across 4 product lines before backend implementation. Led API contract standardisation across RSA, PUD, and platform teams. Mentored junior engineers on architecture patterns and delivery. Impact: App registrations +91%, registration time -50%, support calls -43%.
- Spring Boot BFF & Backend APIs:** Built Spring Boot BFF layer aggregating multi-source APIs into structured payloads -- IRDAI-compliant PII handling, RBAC-controlled data access, Datadog observability, AWS-deployed microservices across all product lines.
- Admissibility AI Agent -- Agentic System Design:** Architected end-to-end agentic classification pipeline: configurable ML rules engine, React frontend (AI verdict, evidence display, HITL override), closed feedback loop into model retraining. Full ownership from API contract to production.
- PUD -- Config-Driven Backend (1,000+ Garages):** Designed config-driven architecture for PUD: dynamic pricing by pin code, real-time status polling, reusable data-enricher patterns adopted as shared microservice primitives across RSA and PUD.
- Engineering Playbooks & Code Quality:** Built reusable node-based navigation and data-enricher patterns adopted as shared primitives. Resolved 30+ portal bugs in FFv2 in 3--4 days. Set code review standards across cross-team deliveries.

Dell Technologies Aug 2021 -- Jan 2025

Software Engineer · SDE1 → SDE2 (Promoted) · Bengaluru

- CI/CD & DevOps Ownership [SDE2]:** Owned security posture and deployment practices across DISCP and One Cost: PCF vulnerability remediation (60--70% CVEs resolved), CI/CD coverage 60%→97% via GitHub Actions + Jenkins. Docker and Kubernetes deployments across both product lines.
- Unified Cost Management Dashboard (Java + Spring Boot + Oracle SQL) [SDE2]:** Full-stack enterprise system on PCF -- Spring Boot REST APIs, Layer-7 auth (enterprise SSO), RBAC (approver/viewer/admin). 50% approval-efficiency gain, \$65M ROI in FY.
- Python Flask Backend + Monitoring Tools [SDE1/SDE2]:** Item Usage Dashboard -- Python Flask REST backend + Angular + TLS email engine (-20% manual intervention). Electron JS monitoring widget (-35% response time). Buddy Board data-validation for DISCP procurement.
- AI Chatbot & Speech Recognition (Rasa NLP, Docker, Kubernetes) [Intern]:** Production NLP chatbot with wake-word detection -- 20% efficiency gain; custom speech recognition engine: 85% accuracy on Dell-specific terminology.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence AI / Production

Production agentic pipeline: configurable rules engine, multi-step ML classification, per-rule evidence retrieval, HITL feedback loop into model retraining. Full end-to-end ownership from system design to production rollout.

DELL Supply Chain Optimisation using QUBO Quantum Computing

Adiabatic Quantum Optimisation applied to procurement backlog -- jointly optimising Net MRP, demand forecast, and inventory to reduce logistics costs.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology	2017 -- 2021
CGPA: 9.69 / 10	
High School Diploma -- Computer Science · St. Columba's School, New Delhi	2013 -- 2017
Grade: 9.2	

ACHIEVEMENTS

- Patent Authorised** -- DELL TIDE Hack2Evolve · [Gen AI for Code Reusability & Sustainability](#)
- 1st Place** -- GSCM-TECH-A-THON, DELL · [Parquet automation: 8 hrs to 2 min](#)
- 4th Place** -- Ackathon 2024, ACKO · [Acko Global Care -- AI-powered medical platform](#)
- Debashish Chatterjee Award** · [Highest marks in Computer Science](#)

TECHNICAL SKILLS

- Backend:** Java, Spring Boot (REST APIs, Layer-7 Auth, PCF), Python (Flask, Rasa NLP), Node.js
- Databases:** MongoDB, PostgreSQL, Oracle, SQL **Cloud & DevOps:** AWS, Docker, Kubernetes, PCF, CI/CD (GitHub Actions, Jenkins), Git
- Architecture:** Microservices, REST APIs, BFF Pattern, System Design (HLD/LLD), API Contract Design
- Frontend:** React.js, Angular (3 yrs), TypeScript, JavaScript ES6+, SCSS, Redux
- AI / ML:** Gen AI, LLM APIs, Rasa NLP, Prompt Engineering, AI Agent Pipelines
- Analytics & Observability:** Datadog (production, Acko), Segment, Growthbook
