PROFESSIONAL SUMMARY

Full-stack SDE2 with ~5 years building Node.js/TypeScript APIs and React frontends in production. At Acko, operated at founding-engineer level -- owned API contract design across 3 product lines, built the Spring Boot BFF layer aggregating multi-source APIs, and delivered distributed UI systems (RSA, PUD, CES) end-to-end. At Dell, built Layer-7 auth systems (enterprise SSO + RBAC) and CI/CD infrastructure. Strong in REST API design, distributed systems, and multi-cloud (AWS, PCF, Docker/K8s). Targeting founding engineer or senior backend API roles at identity and developer infrastructure companies.

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 · Bengaluru

- BFF & API Architecture -- Founding Engineer Scope:** Owned API contract design across RSA, PUD, and platform teams -- standardising input/output schemas before backend implementation. Built Spring Boot BFF layer aggregating multi-source APIs into UI-optimised payloads. Drove cross-team API discussions and code reviews across 4 product lines on AWS-hosted services.
- RSA -- Roadside Assistance Platform (React + Node.js + SDUI):** Owned complete RSA frontend and backend integration: dynamic question engine, slot booking, Google Maps location handling, live tracking, and Advisor Portal for ops agents. Impact: App registrations +91%, registration time -50%, support calls -43%.
- CES Live Tracking & Distributed Status System:** Built real-time field-executive tracking UI with Google Maps and ETA via Distance Matrix API. Delivered Claim Timeline with SLA state machine (On Time / At Risk / Breached) -- adopted across all claim-handler workflows.
- Admissibility AI Agent -- Agentic Classification Pipeline:** Architected an AI agentic system classifying insurance claims with ML rules. Built React frontend: AI verdict display, per-rule pass/fail, supporting evidence, HITL override feedback loop into retraining.
- PII-Compliant Data Handling & RBAC:** Implemented PII-masked phone numbers (IRDAI-compliant), RBAC-controlled access to sensitive claim data, Segment analytics and Growthbook feature-flag rollouts across all product lines.

- Layer-7 Auth & RBAC -- Unified Cost Management Dashboard [SDE2]:** Built full-stack enterprise admin on PCF -- Angular frontend, Spring Boot REST APIs, Layer-7 auth (enterprise SSO), RBAC with approver/viewer/admin separation. 50% approval-efficiency gain, \$65M ROI in FY.
- Security & DevOps Lead -- CI/CD & Vulnerability Remediation [SDE2]:** Owned CI/CD pipeline across two products. PCF vulnerability remediation: 60--70% of CVEs resolved. DevOps coverage: 60%→97%. GitHub Actions + Jenkins; Docker and Kubernetes deployments.
- Item Usage Dashboard (Node.js + Angular + Flask) [SDE2]:** REST backend + TLS email notification engine -- reduced manual process intervention by 20%.
- Eye On Desktop Widget & Buddy Board [SDE1]:** Electron JS monitoring tool (response time -35%); Angular + Python + Spring Boot data-validation dashboard eliminating manual entry errors across procurement workflows.
- AI Chatbot (Rasa NLP, Docker, Kubernetes) [Intern]:** Containerised NLP chatbot with wake-word detection -- 20% interaction efficiency. Custom speech recognition engine: 85% accuracy.
