PROFESSIONAL SUMMARY

Senior full-stack engineer with ~5 years building AI-enabled production systems at scale. At Acko, architected a production AI pipeline for claims decisioning - configurable rules engine, ML classification, and contra-action feedback loop - deployed across 100k+ annual claims. Strong Java backend (Spring Boot, BFF pattern, REST APIs) and full-stack React/TypeScript ownership across complex data-driven UIs. Experienced building scalable, observable systems with Segment instrumentation and Growthbook feature-flag rollouts. Currently exploring Go and ClickHouse as next stack extensions for data platform engineering.

CORE COMPETENCIES

Production AI Pipeline Design

Java Backend Services (Spring Boot)

React / TypeScript

Scalable Data Systems

Vector Search & LLM Integration

Observability & Instrumentation

REST API Design & Microservices

Cross-Functional Technical Leadership

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 - AI-Enabled · Bengaluru

- Admissibility AI Agent - Production AI Pipeline:** Architected an AI-enabled claims decisioning system with a configurable rules engine, ML classification (admissible / fraudulent / document-deficient / manual-review), and a contra-action feedback loop - override signals retrain the model continuously. Owned the full recommendation display layer: AI verdict, per-rule pass/fail breakdown, and supporting evidence per classification.
- Acko Global Care - LLM Pipeline (Ackathon 2024, 4th Place):** Built a multi-stage LLM pipeline: diagnosis extraction from medical reports → structured vector-similarity matching for hospital and specialist recommendations → treatment cost estimation → best-doctor ranking. End-to-end AI architecture from ingestion to ranked output.
- RSA - Roadside Assistance Platform (React + Angular SDUI):** Owned the complete RSA frontend and backend integrations. Segment instrumentation and Growthbook feature-flag rollouts for observable, controlled delivery. Impact: app registrations +91%, registration time -50%, weekly support calls -43%, CES ~90%.
- CES Live Tracking & Claim Timeline:** Built real-time field-executive tracking with Google Maps, Distance Matrix ETA, and SLA tags (On Time / At Risk / Breached). Full Segment observability across claim-handler workflows - adopted across all handler flows.
- PUD - Pickup & Drop (1,000+ Garages, SDUI):** Owned config-driven SDUI frontend with dynamic slot-bias logic (ADSC vs non-ADSC), free/paid pricing by pin code, and real-time status polling. Built reusable node-based navigation and data-enricher patterns adopted as shared primitives across RSA and PUD.
- Cross-Team:** Led API contract design and cross-team code reviews; mentored junior engineers on RSA and PUD patterns. Resolved 30+ portal bugs in FFv2 in 3-4 days; implemented auto-attendance tracking APIs and DB config for timeline event mapping.

Dell Technologies Aug 2021 - Jan 2025

Software Engineer 2 (promoted from SDE1) - Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard:** Java Spring Boot backend + Angular DevExtreme frontend with Layer-7 auth, Oracle DB, and PCF production deployment. 50% approval-efficiency gain, \$65M ROI in FY. DevOps coverage raised from 60% to 97%+.
- PRISMO & DISCP AI Chatbot (Rasa NLP):** Containerised with Docker and Kubernetes - 20% interaction efficiency gain; trained on real user conversation data. Speech Recognition Engine with custom domain model: 85% accuracy in production transcriptions.
- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool - reduced issue-identification response time by 35% for Ops and Dev Engineering teams.
- Buddy Board:** Angular + Python + Spring Boot automated data-validation and status dashboard for DISCP - eliminated manual data-entry errors across procurement workflows.

SDE Winter Intern · Ghaziabad

- Radar Console Displays for multi-object tracking - trajectory, distance, and bearing calculations using Qt IDE.

PROJECTS

Admissibility AI Agent - Claims Intelligence Production AI

End-to-end production AI pipeline at Acko: configurable rules engine → ML classification → recommendation display layer → contra-action feedback loop for continuous model retraining. Deployed across 100k+ annual claims, reducing handler decisioning time and improving audit consistency.

Java · Spring Boot · React · TypeScript · ML Classification · Segment · Growthbook

Acko Global Care - LLM Pipeline Ackathon 2024 · 4th Place

Multi-stage LLM pipeline: medical report ingestion → structured diagnosis extraction → vector-similarity hospital and specialist matching → cost estimation → ranked doctor recommendations. Full AI architecture from raw input to personalised ranked output.

LLM APIs · Vector Search · Python · React · Prompt Engineering

DELL Supply Chain Optimisation using QUBO Quantum AI

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory - significantly reducing associated logistics costs.

Quantum Computing · QUBO · Optimisation · Python

Energy Prediction Model - Robotech Labs (IIT Delhi) ML · Cloud

ML model forecasting power output for a Combined Cycle Power Plant using AWS, IoT sensor data, and regression techniques - with end-to-end cloud deployment.

AWS · IoT · ML · Python · Regression

EDUCATION

B.Tech - Computer Science Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised - Dell Technologies · TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability	2023
1st Place - GSCM-TECH-A-THON, Dell · Parquet automation: 8 hrs → 2 min for large data files	2023
4th Place - Ackathon 2024, Acko · Acko Global Care - AI-powered LLM medical tourism platform	2025

SKILLS

Backend: Java, Spring Boot, Python, Node.js, Go (exploring) **Frontend:** React, Angular (3 yrs), TypeScript, JavaScript, CSS

AI / ML: LLM APIs, Vector Search, ML Classification, Rasa NLP, Prompt Engineering

Data: SQL, Oracle, MongoDB, ClickHouse (exploring), SDUI / BFF Pattern **Infra:** Docker, Kubernetes, PCF, CI/CD, Git, Segment, Growthbook

Architecture: Microservices, REST APIs, Micro-frontends, Observability
