PROFESSIONAL SUMMARY

Full-stack engineer with ~5 years building instrumented, config-driven React UIs at production scale. Deep expertise in reusable component architectures (SDUI write-once model), product analytics instrumentation (Segment, Growthbook), and full-stack delivery from API contract through polished UI. Shipped high-impact frontend products at Acko -- RSA (+91% registrations), Pickup & Drop (1,000+ garages), and CES Live Tracking -- all instrumented with usage analytics that directly informed iteration. Server-side depth in Java/Spring Boot and Node.js for cross-team API collaboration.

CORE COMPETENCIES

React.js & TypeScript

Write-Once Component Architecture (SDUI)

Product Instrumentation (Segment)

Feature Flags (Growthbook)

Full-Stack API Integration

Frontend Architecture (Perf, Security, UX)

Java / Node.js Backend Services

Code Reviews & Mentorship

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Bengaluru

- Product Instrumentation & UX Optimisation:** Instrumented all critical user flows across RSA, PUD, CES, and Claims with Segment analytics and Growthbook feature-flag rollouts. Usage data directly informed UX decisions -- funnel analysis surfaced bottlenecks that drove the RSA registration rate from 18% to 34.5% (+91%). Staged cohort rollouts via Growthbook reduced production incidents on new UI flows.
- RSA -- Write-Once SDUI Component Architecture (React):** Designed and owned a config-driven React component model for Roadside Assistance: one component set, multiple product flows configured via schema (no code changes per new flow). Dynamic question engine, slot booking, Google Maps location, garage selection, custodian flow, review screen, live tracking, and Advisor Portal -- all built on the shared primitive set. Registration time -50%, weekly support calls -43%.
- PUD -- Pickup & Drop (React SDUI, 1,000+ Garages):** Extended the write-once component model to Pickup & Drop: garage selection with dynamic ADSC/non-ADSC bias, free/paid pricing by pin code, real-time status polling. Built node-based navigation and data-enricher primitives adopted as shared standards across RSA and PUD -- saved ~15+ days of divergent implementation per sprint cycle.
- CES Live Tracking & Claim Timeline:** Real-time field-executive tracking UI (Google Maps + Distance Matrix ETA), SLA audit trail (On Time/At Risk/Breached), Segment-instrumented claim events -- adopted across all claim-handler workflows. Feature-flag-controlled rollout via Growthbook.
- Full-Stack API Integration & BFF Design:** Led API contract design across RSA and PUD teams -- Spring Boot BFF layer mediating data contracts between React frontend and multiple backend services. PII-masked phone proxy (IRDAI compliance), REST API design optimised for UI-first consumption.
- Admissibility AI Agent -- Frontend Layer:** Built the complete React recommendation display layer for an AI claims decisioning pipeline: per-rule pass/fail breakdown, supporting evidence, contra-action flagging UI. Handler overrides feed back into the model retraining loop.
- Mentorship & Code Reviews:** Cross-team code reviews across RSA and PUD; mentored junior engineers on SDUI patterns and API contract design. Established shared review standards that reduced re-work across sprint cycles.

Dell Technologies Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard (Angular + Java):** Full-stack delivery: Angular + DevExtreme frontend, Spring Boot Java backend, Oracle DB, Layer-7 auth, PCF cloud-native deployment. 50% approval-efficiency gain, \$65M ROI in FY.
- PRISMO AI Chatbot (Docker + Kubernetes):** Rasa NLP service containerised with Docker and K8s -- 20% interaction efficiency, 85% speech accuracy in production. Wake-word detection trained on real conversation data.
- DevOps & Security:** DevOps coverage 60% to 97%+; PCF vulnerability remediation (60-70%); Buddy Board (Angular + Python) for automated data validation; Eye On Desktop (Electron JS) monitoring tool (-35% issue-response time).

KEY PROJECTS

Acko Global Care -- LLM Pipeline AI / Hackathon 4th Place

End-to-end AI medical tourism platform: LLM-based diagnosis extraction, vector-similarity hospital matching, cost estimation, ranked output. Multi-stage pipeline from report parsing to personalised recommendation.

DELL Supply Chain Optimisation using QUBO Quantum ML

Adiabatic Quantum Optimisation applied to procurement backlog -- joint optimisation of Net MRP, demand forecast, and inventory with significant logistics cost reduction.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

- Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability
- 1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min for large data files
- 4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical tourism LLM pipeline

TECHNICAL SKILLS

- Frontend: React.js, Angular (3 yrs), TypeScript, JavaScript ES6+, HTML5, CSS3, SDUI, Material UI, Electron JS
- Analytics & Feature Flags: Segment (product instrumentation), Growthbook (feature flags, cohort rollouts), Google Maps API
- Backend: Java, Spring Boot, Node.js, Python, REST APIs, BFF Pattern, Microservices
- Cloud & DevOps: PCF (cloud-native), Docker, Kubernetes, CI/CD, Git AI / ML: LLM APIs, ML Pipelines, Vector Retrieval, Rasa NLP, Gen AI
- Databases: MongoDB, Oracle, SQL
