PROFESSIONAL SUMMARY

Full-stack engineer with ~5 years shipping scalable, cloud-native Java and React systems in regulated production environments. Deep expertise in Java/Spring Boot backend services, React SDUI architecture, cloud-native deployment (PCF, Docker, Kubernetes), and architecture leadership across cross-functional teams. Built and owned AI-driven decisioning pipelines in regulated domains -- production-scale proof of the Health & AI intersection Oracle is building toward. Consistent track record of quantified outcomes: +91% app registrations, \$65M ROI, AI pipelines handling 100k+ decisions annually.

CORE COMPETENCIES

Java / Spring Boot

React.js / TypeScript

Cloud-Native Systems (PCF, K8s)

Distributed REST APIs

Architecture & Design Reviews

AI-Driven Decisioning Pipelines

User Management & Auth (Layer-7)

Technical Roadmaps & Mentorship

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 - AI-Enabled · Bengaluru

- Architecture & Technical Leadership:** Led architecture discussions, API contract design, and cross-team code reviews across RSA and PUD product teams. Built shared primitives (node-based navigation, data-enricher patterns) adopted as org-wide standards, saving ~15+ days of divergent implementations across sprints.
- RSA - Scalable Cloud-Native Platform (React + Spring Boot):** Full-stack ownership of a high-availability roadside assistance platform. Config-driven SDUI architecture, dynamic slot booking, Google Maps integration, PII-masked phone flows (IRDAI compliance), Segment analytics. Impact: registrations +91%, registration time -50%, support calls -43%.
- Admissibility AI Agent - Health & AI Decisioning Pipeline:** Designed and shipped a production AI system classifying 100k+ annual insurance claims (admissible/fraud/document-deficient/manual-review). Architecture: configurable rules engine + ML classification + recommendation UI + contra-action feedback loop that retrains the model on handler overrides. Directly analogous to Oracle's healthcare AI decisioning goals.
- Acko Global Care - LLM Pipeline (Ackathon 2024, 4th Place):** Multi-stage LLM pipeline for an AI medical tourism platform: report parsing + structured extraction + vector-similarity hospital matching + cost estimation + ranked output. Production-quality AI architecture built end-to-end.
- CES Live Tracking & Claim Timeline:** Real-time field-executive tracking UI (Google Maps + Distance Matrix ETA), SLA audit trail (On Time/At Risk/Breached) -- adopted across all claim-handler workflows. Observability built in as a first-class feature.
- PUD - Pickup & Drop (React SDUI, 1,000+ Garages):** Config-driven SDUI frontend with garage steerability, ADSC bias logic, free/paid pricing by pin code, real-time polling. Reusable patterns adopted across RSA and PUD teams.

Dell Technologies Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard -- Cloud-Native (Java + Angular):** Spring Boot backend + Angular + Oracle DB + Layer-7 user management and auth, deployed on PCF (Pivotal Cloud Foundry, enterprise cloud-native). 50% approval-efficiency gain, \$65M ROI in FY. DevOps coverage lifted from 60% to 97%+.
- PRISMO & DISCP AI Chatbot (SDE1):** Rasa NLP service containerised with Docker and Kubernetes -- 20% interaction efficiency gain, 85% speech accuracy in production. Containerisation enforced clean service boundaries and enabled zero-downtime deploys.
- Security & DevOps:** PCF vulnerability remediation (60-70% reduction); Item Usage Dashboard with Flask Mail + Angular TLS email engine (-20% manual intervention); Eye On Desktop (Electron JS) proactive monitoring tool (-35% issue-response time).

KEY PROJECTS

DELL Supply Chain Optimisation using QUBO Quantum ML

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory -- significant logistics cost reduction.

Energy Prediction Model -- Robotech Labs (IIT Delhi) ML / Cloud (AWS)

ML model forecasting power output for a Combined Cycle Power Plant using AWS, IoT sensor data, and regression techniques -- end-to-end cloud deployment.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

- Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability
- 1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min for large data files
- 4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical tourism LLM pipeline

TECHNICAL SKILLS

- Backend: Java, Spring Boot, Node.js, Python, REST APIs, BFF Pattern, Microservices
- Frontend: React.js, Angular (3 yrs), TypeScript, JavaScript ES6+, SDUI, HTML5, CSS3
- Cloud & DevOps: PCF (cloud-native), Docker, Kubernetes, CI/CD, Git; OCI / Terraform (exploring)
- Security & Auth: Layer-7 auth, IRDAI compliance, PII data handling, audit trails
- AI / ML: LLM APIs, ML Pipelines, Vector Retrieval, Gen AI, Rasa NLP, Prompt Engineering Databases: MongoDB, Oracle, SQL
- Analytics: Segment, Growthbook, Google Maps API, JIRA, Figma
