PROFESSIONAL SUMMARY

Senior full-stack engineer with ~5 years building high-throughput systems in regulated fintech environments. At Acko, owned end-to-end product development across Java/Spring Boot APIs and React/Angular frontends - including PII-masked phone handling and IRDAI-compliant audit flows handling millions of policy and claims events. Architected an AI-driven decisioning pipeline (ML classification + LLM personalisation) and a multi-stage recommendation engine deployed to production. At Dell, built enterprise Java backend services managing \$65M in annual procurement spend. Strong in REST/JSON APIs, SQL/NoSQL, Node.js, and microservices architecture.

CORE COMPETENCIES

Java / Spring Boot Backend

React / Node.js Frontend

Fintech Compliance & PII Handling

REST / JSON APIs

AI-Driven Personalisation

SQL & NoSQL Databases

Microservices Architecture

High-Throughput Systems

WORK EXPERIENCE

Acko General Insurance

Jan 2025 - Present

Software Development Engineer 2 - AI-Enabled · Bengaluru

- RSA - Roadside Assistance Platform (High-Throughput, Regulated):** Full-stack ownership of a high-volume roadside assistance system - React + Angular SDUI frontend, Spring Boot BFF, REST/JSON APIs, PII-masked phone number proxy (IRDAI-compliant), IRDAI audit-compliant data flows. Impact: +91% registrations, -50% registration time, -43% support calls, CES ~90%. Built Advisor Portal for internal ops handling end-to-end booking management.
- Admissibility AI Agent - AI-Driven Decisioning:** Architected an AI-driven claims decisioning pipeline with configurable rules engine, ML classification across 4 claim categories, and a recommendation display layer. Contra-action feedback loop feeds override signals back to retrain the model - AI-driven personalisation improving accuracy over time.
- Acko Global Care - Personalised Recommendation Engine (Ackathon 2024, 4th Place):** LLM-based pipeline: diagnosis extraction → structured data processing → personalised hospital and specialist recommendations → cost estimation → ranked doctor output. End-to-end AI-driven content personalisation for millions of potential users.
- PUD - Pickup & Drop (1,000+ Garages):** Config-driven SDUI frontend with dynamic pricing logic (free/paid by pin code), ADSC garage steerability, real-time status polling via REST APIs. Shared navigation and data-enricher primitives adopted across RSA and PUD.
- CES Live Tracking & Audit Trail:** Real-time field-executive tracking (Google Maps, Distance Matrix API), SLA tags (On Time / At Risk / Breached), Segment analytics instrumentation, and full claim audit trail across all handler workflows.
- Cross-Team Leadership:** Led API contract design and cross-team code reviews; mentored junior engineers. Implemented auto-attendance tracking APIs, DB config for timeline event mapping. Resolved 30+ portal bugs in 3-4 days.

Dell Technologies

Aug 2021 - Jan 2025

Software Engineer 2 (promoted from SDE1) - Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard (\$65M):** Java Spring Boot backend with Layer-7 auth, Oracle DB, Angular DevExtreme frontend, PCF production deployment. 50% approval-efficiency gain on \$65M annual procurement spend. Raised DevOps coverage from 60% to 97%+; PCF vulnerability remediation 60-70%.
- PRISMO & DISCP AI Chatbot (Rasa NLP):** Containerised with Docker and Kubernetes - 20% interaction efficiency gain. Speech Recognition Engine: custom domain model with 85% accuracy in production transcriptions.
- Item Usage Dashboard:** Flask Mail + Angular TLS email engine - reduced manual process intervention by 20%.
- Buddy Board:** Angular + Python + Spring Boot automated data-validation and status dashboard for DISCP - eliminated manual data-entry errors across procurement workflows.

Bharat Electronics Limited

Dec 2019 - Jan 2020

SDE Winter Intern · Ghaziabad

- Radar Console Displays for multi-object tracking - trajectory, distance, and bearing calculations using Qt IDE.

PROJECTS

RSA - Roadside Assistance Platform Fintech Compliance · High-Throughput

End-to-end product: React + Angular SDUI, Spring Boot BFF, REST/JSON APIs, PII masking (IRDAI-compliant), IRDAI audit flows, Segment instrumentation. +91% registrations, -50% time, -43% support calls - deployed to millions of Acko policyholders.
Java · Spring Boot · React · Angular · TypeScript · REST · Segment · Growthbook

Admissibility AI Agent - AI-Driven Decisioning Production AI

Production AI-driven decisioning pipeline: configurable rules engine → ML classification (4 categories) → recommendation display → feedback loop for model retraining. Reduced handler decisioning time and improved audit consistency across 100k+ annual claims.
Java · Spring Boot · React · ML Classification · LLM APIs · REST APIs

Acko Global Care - AI-Driven Personalisation Ackathon 2024 · 4th Place

Multi-stage LLM pipeline delivering personalised recommendations: diagnosis extraction → vector-similarity hospital matching → cost estimation → ranked doctor recommendations. AI-driven content personalisation from raw medical input to ranked output.
LLM APIs · Python · React · Node.js · Vector Search · Prompt Engineering

Unified Cost Management Dashboard - Dell \$65M ROI

Java Spring Boot + Angular + Oracle enterprise dashboard with Layer-7 auth and PCF cloud-native deployment. \$65M spend management, 50% approval-efficiency gain, DevOps coverage 60%→97%+.
Java · Spring Boot · Angular · Oracle · PCF · Layer-7 Auth

EDUCATION

B.Tech - Computer Science Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

- Patent Authorised - Dell Technologies · TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability2023
- 1st Place - GSCM-TECH-A-THON, Dell · Parquet automation: 8 hrs → 2 min for large data files2023
- 4th Place - Ackathon 2024, Acko · Acko Global Care - AI-powered medical tourism platform2025

SKILLS

Backend: Java, Spring Boot, Python, Node.js, REST/JSON APIs Frontend: React, Angular (3 yrs), TypeScript, JavaScript, CSS, Material UI
AI / ML: LLM APIs, AI-Driven Personalisation, ML Classification, Rasa NLP, Prompt Engineering Databases: SQL, Oracle, MongoDB, MySQL
Infra: Docker, Kubernetes, PCF, CI/CD, Git Architecture: Microservices, BFF Pattern, SDUI, Micro-frontends, High-Throughput APIs
Compliance: PII Handling, IRDAI Audit Flows, Segment Analytics
