PROFESSIONAL SUMMARY

Senior full-stack engineer with ~5 years building production AI systems and full-stack fintech products. Deep expertise in AI integration patterns and LLM APIs - shipped production ML pipelines, LLM-based decisioning, and vector retrieval systems at Acko. Java/Spring Boot backend depth and React SDUI frontend ownership across high-throughput insurance platforms. Consistent track record of measurable impact: +91% app registrations, \$65M procurement ROI, multi-stage LLM pipelines deployed at scale.

CORE COMPETENCIES

AI Integration Patterns

LLM APIs & ML Pipelines

Java / Node.js Backend

React Full-Stack

Spring Boot REST APIs

Vector Retrieval / RAG

Microservices Architecture

Docker & Kubernetes

Mentorship & Architecture Leadership

WORK EXPERIENCE

Acko General Insurance

Jan 2025 - Present

Software Development Engineer 2 - AI-Enabled · Bengaluru

- Admissibility AI Agent - AI Integration Pipeline:** Architected production AI pipeline integrating LLM-based decisioning, configurable rules engine, and ML classification - automatically routing 100k+ annual claims as admissible, fraudulent, document-deficient, or manual-review. Built recommendation display layer showing AI verdict with per-rule pass/fail breakdown and supporting evidence. Implemented contrary-action feedback loop: handler overrides retrain the model, enabling continuous accuracy improvement over time.
- Acko Global Care - Multi-Stage LLM Pipeline (Ackathon 2024, 4th Place):** Built AI medical tourism platform with end-to-end LLM pipeline - LLM-based diagnosis extraction from medical reports → structured data extraction → vector-similarity hospital matching → personalised specialist recommendation → treatment cost estimation → ranked output. Pipeline architecture referenced post-hackathon by the team.
- RSA - Roadside Assistance Platform (React + Angular SDUI):** Full-stack ownership: dynamic question engine, slot booking, Google Maps, garage selection, live tracking, and Advisor Portal. Impact: registrations 18% → 34.5% (+91%), time -50%, support calls -43%. SDUI config-driven patterns adopted as shared primitives across RSA and PUD.
- Java/Node.js Backend Services:** High-throughput REST APIs using Spring Boot BFF pattern - auto-attendance tracking, timeline event mapping, DB config APIs; resolved 30+ portal bugs in FFv2 in 3-4 days. Segment analytics and Growthbook feature-flag rollouts.
- CES Live Tracking & Claim Timeline:** Real-time field-executive tracking UI (Google Maps + Distance Matrix API), SLA audit trail (On Time / At Risk / Breached) - adopted across all claim-handler workflows.
- Cross-team Architecture & Mentorship:** Led API contract discussions and cross-team code reviews; created reusable node-based navigation and data-enricher patterns adopted across RSA and PUD. Mentored junior engineers on fast-follower features and SDUI primitives.

Dell Technologies

Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard:** Java Spring Boot + Angular + Oracle + Layer-7 auth on PCF - 50% approval-efficiency gain, \$65M ROI in FY. Cloud-native production deployment.
- PRISMO & DISCP AI Chatbot (Intern → SDE1):** Rasa NLP containerised with Docker & Kubernetes - 20% interaction efficiency gain, 85% speech accuracy in production. Wake-word detection trained on real user data.
- DevOps & Security:** DevOps coverage 60% → 97%+; PCF vulnerability remediation 60-70%; Item Usage Dashboard with Flask Mail + Angular TLS email engine (-20% manual intervention).

KEY PROJECTS

DELL Supply Chain Optimisation using QUBO

Quantum ML

Applied Adiabatic Quantum Optimisation to minimise procurement backlog - jointly optimising Net MRP, demand forecast, and inventory with significant logistics cost reduction.

Energy Prediction Model - Robotech Labs (IIT Delhi)

ML / Cloud

ML model forecasting power output for a Combined Cycle Power Plant using AWS, IoT sensor data, and regression techniques - end-to-end cloud deployment.

EDUCATION

B.Tech - Computer Science · Sikkim Manipal Institute of Technology

CGPA: 9.69 / 10

2017 - 2021

ACHIEVEMENTS

Patent Authorised - DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place - GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs → 2 min for large data files

4th Place - Ackathon 2024, ACKO · Acko Global Care - AI-powered medical tourism platform (LLM pipeline)

TECHNICAL SKILLS

AI / ML: AI Integration Patterns, LLM APIs, ML Pipelines, Vector Retrieval, Gen AI, NLP, Rasa, Prompt Engineering

Backend: Java, Spring Boot, Node.js, Python, REST APIs, BFF Pattern, Microservices

Frontend: React, Angular, TypeScript, JavaScript, SDUI, Material UI DevOps & Cloud: Docker, Kubernetes, PCF, CI/CD, Git

Databases: MongoDB, Oracle, SQL, NoSQL Analytics: Segment, Growthbook, Google Maps API, JIRA, Figma
