PROFESSIONAL SUMMARY

Frontend engineer with ~5 years building config-driven React and Angular products from initial launch through measurable scale. Deep expertise in SDUI architecture -- reusable, config-driven UI components that dynamically render backend-driven settings -- enabling new product variants without code deploys. At Acko, built RSA as a consumer checkout flow (slot booking, payment eligibility, dynamic pricing, funnel analytics) with +91% registration improvement. Growthbook A/B testing and Segment instrumentation across all product lines. Strong Angular depth (3 yrs at Dell), mentoring track record, and cross-team architecture influence.

CORE COMPETENCIES

Config-Driven UI Architecture (SDUI)

React.js & TypeScript

Angular (3 yrs, Enterprise-Scale)

A/B Testing & Feature Flags (Growthbook)

Product Analytics (Segment)

Checkout & Subscription Flow UX

Code Reviews & Mentorship

RESTful APIs & BFF Pattern

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Bengaluru

- RSA -- Consumer Checkout Flow (React SDUI):** Built RSA as a full checkout-style consumer journey -- slot booking (schedule → confirm → eligibility), dynamic pricing rules, payment gating, review screen, and post-booking live tracking. Config-driven SDUI architecture: new pricing variants and flow branches deploy via backend schema, not frontend code changes. Impact: registrations 18% to 34.5% (+91%), registration time -50%, support calls -43%.
- Config-Driven UI Components (SDUI):** Designed and owned the SDUI component model across RSA and PUD -- reusable question engine, garage selection, and slot-booking primitives that dynamically render backend-driven settings. New product flows ship in 1-2 days via config updates; patterns adopted as org-wide shared standards across RSA and PUD, saving ~15+ days of divergent implementations per sprint.
- Advisor Portal -- Internal Admin Tool:** Built internal admin application for RSA operations teams -- booking management, field-executive live tracking, job status updates, and end-to-end request management. Direct analog to Monetization's billing admin tooling for sales and finance teams.
- A/B Testing & Analytics Instrumentation:** Instrumented Growthbook A/B feature-flag rollouts and Segment product analytics across RSA, PUD, CES, and Claims. Staged cohort controls enabled data-driven pricing and funnel optimisation -- directly informed the funnel improvements behind RSA's +91% registration lift.
- API Contract Design & Mentorship:** Led cross-team API contract discussions across RSA, PUD, and platform teams. Mentored junior engineers on SDUI patterns and component architecture. Cross-team code reviews enforcing frontend performance and maintainability standards.
- PUD -- Pickup & Drop (React SDUI, 1,000+ Garages, 5 Markets):** Config-driven React frontend scaling across multiple service areas with different pricing, garage steerability, and slot availability rules. Reusable node-based navigation and data-enricher primitives adopted as shared standards alongside RSA.

Dell Technologies Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard (Angular + Spring Boot):** Full-stack enterprise admin application on PCF cloud-native: Angular + DevExtreme frontend, Spring Boot REST APIs, Layer-7 auth. 50% approval-efficiency gain, \$65M ROI in FY. Comparable to internal finance/admin tooling for billing operations.
- Item Usage Dashboard (Angular + Python Flask):** Angular frontend + Python Flask REST backend + TLS email notification engine -- reduced manual process intervention by 20%. Backend REST API designed for cross-team consumption.
- Eye On Desktop Widget (Electron JS):** Proactive desktop monitoring tool using Electron JS -- reduced issue-identification response time by 35% for OPs and Dev Engineering teams.
- DevOps & Security Lead:** DevOps coverage 60% to 97%+; PCF cloud-native vulnerability remediation (60-70%); CI/CD pipeline ownership across DISCP and One Cost products.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence AI / Production

React recommendation UI for AI claims decisioning pipeline -- per-rule pass/fail breakdown, supporting evidence, contra-action flagging. Handler overrides feed back into the model retraining loop. End-to-end ownership from API contract to production rollout.

DELL Supply Chain Optimisation using QUBO Patent Authorised

Adiabatic Quantum Optimisation applied to procurement backlog -- joint optimisation of Net MRP, demand forecast, and inventory. Patent authorised: TIDE Hack2Evolve (Gen AI for Code Reusability & Sustainability).

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min

4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform

TECHNICAL SKILLS

Frontend: React.js, Angular (3 yrs), TypeScript, JavaScript ES6+, HTML5, CSS3, SDUI, Electron JS, Material UI
Backend: Java, Spring Boot, Python (Flask, Rasa NLP), Node.js, REST APIs, BFF Pattern, Microservices; GraphQL (learning)
Databases: MongoDB, Oracle, SQL Cloud & DevOps: PCF (cloud-native), Docker, Kubernetes, CI/CD, Git
Analytics & Testing: Segment (product instrumentation), Growthbook (A/B testing & feature flags), Google Maps API
AI / ML: LLM APIs, ML Pipelines, Gen AI, Prompt Engineering
