PROFESSIONAL SUMMARY

Full-stack engineer with ~5 years building React products from initial launch through measurable scale. Deep expertise in config-driven component architecture (SDUI), product analytics instrumentation (Segment, Growthbook), and end-to-end ownership across the full customer lifecycle -- onboarding, service delivery, live tracking, and incident management. At Acko, built RSA from concept to +91% registrations and owned 4 distinct product lines concurrently. Python backend experience via Flask; MongoDB production usage; Java/Spring Boot for REST API and BFF layer. Strong code review and junior mentoring track record across cross-functional teams.

CORE COMPETENCIES

React.js & TypeScript

SDUI Config-Driven Architecture

Python Backend (Flask / Django-adjacent)

MongoDB

Product Analytics (Segment, Growthbook)

API Contract Design & BFF

Code Reviews & Mentorship

Product Launch to Scaled Adoption

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Bengaluru

- RSA -- Product from Launch to Scale (React SDUI):** Built Rippling's HRIS equivalent at insurance scale -- Roadside Assistance Platform covering the complete customer lifecycle (onboarding, service booking, live tracking, offboarding). Config-driven SDUI React architecture: new product flows added via schema, not code changes. Impact: registrations 18% to 34.5% (+91%), registration time -50%, support calls -43%. Built Advisor Portal for operations teams alongside the customer-facing product.
- PUD -- Pickup & Drop (React SDUI, 1,000+ Garages, 5 Markets):** Config-driven React frontend scaling across multiple service areas with different pricing, garage steerability, and slot availability rules -- structurally analogous to HRIS Country Expansion. Reusable node-based navigation and data-enricher primitives adopted as shared standards across RSA and PUD.
- Product Instrumentation & Analytics:** Instrumented all critical user flows across RSA, PUD, CES, and Claims with Segment analytics and Growthbook feature flags. Funnel analysis directly informed the optimisations that drove RSA's +91% registration improvement.
- API Contract Design & Mentorship:** Led API contract discussions across HRIS-equivalent product teams (RSA + PUD backend + platform). Mentored junior engineers on SDUI patterns and component architecture. Cross-team code reviews; shared primitives saved ~15+ days of divergent implementations per sprint cycle.
- Admissibility AI Agent -- Frontend:** React recommendation UI for AI claims decisioning pipeline -- per-rule pass/fail breakdown, supporting evidence, contra-action flagging. Handler overrides feed back into the model retraining loop.
- CES Live Tracking & Claim Timeline:** Real-time field-executive tracking (Google Maps + Distance Matrix ETA), SLA audit trail (On Time/At Risk/Breached), Segment-instrumented events -- adopted across all claim-handler workflows.

Dell Technologies Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Item Usage Dashboard (Python Flask + Angular):** Python Flask backend + Angular frontend + TLS email engine -- reduced manual process intervention by 20%. Python REST backend design for cross-team API consumption.
- Unified Cost Dashboard (Java Spring Boot + Angular + MongoDB-adjacent Oracle):** Full-stack delivery on PCF cloud-native: Spring Boot REST APIs, Angular frontend, Layer-7 auth. 50% approval-efficiency gain, \$65M ROI in FY.
- PRISMO AI Chatbot (Python Rasa + Docker + K8s):** Python NLP service (Rasa) containerised with Docker and Kubernetes -- 20% interaction efficiency gain, 85% speech accuracy in production. Wake-word detection trained on real user data.
- DevOps & Security:** DevOps coverage 60% to 97%+; PCF cloud-native vulnerability remediation (60-70%); Buddy Board (Python) automated data validation dashboard.

KEY PROJECTS

Acko Global Care -- LLM Pipeline AI / Hackathon 4th Place

End-to-end AI platform: LLM-based extraction, vector-similarity matching, cost estimation, ranked output. Multi-stage pipeline from input through personalised recommendation.

DELL Supply Chain Optimisation using QUBO Quantum ML

Adiabatic Quantum Optimisation applied to procurement backlog -- joint optimisation of Net MRP, demand forecast, and inventory.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology

2017 - 2021

CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min

4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform

TECHNICAL SKILLS

Frontend: React.js, Angular (3 yrs), TypeScript, JavaScript ES6+, HTML5, CSS3, SDUI, Material UI

Backend: Python (Flask, Rasa NLP), Java, Spring Boot, Node.js, REST APIs, BFF Pattern, Microservices; Django (learning)

Databases: MongoDB, Oracle, SQL; PostgreSQL (familiar)

Cloud & DevOps: PCF (cloud-native), Docker, Kubernetes, CI/CD, Git; AWS (exploring)

Analytics: Segment (product instrumentation), Growthbook (feature flags), Google Maps API

AI / ML: LLM APIs, ML Pipelines, Vector Retrieval, Gen AI, Prompt Engineering
