PROFESSIONAL SUMMARY

Frontend engineer with ~5 years building config-driven React and Angular products at production scale. Deep expertise in SDUI architecture, module-federation micro-frontends, Next.js (SSR/SSG), SCSS, CSS Modules, and CSS-in-JS design systems -- all in production at Acko. Designed and owned the SDUI component architecture across 4 product lines (RSA, PUD, CES, Claims); cross-team API contract leadership, junior mentoring, AWS and Docker/Kubernetes deployments. Consistently measurable outcomes: +91% registrations, -50% registration time, -43% support calls. Angular depth: 3 yrs at Dell (enterprise-scale, PCF cloud-native).

CORE COMPETENCIES

React.js & TypeScript

Next.js (SSR/SSG)

Angular (3 yrs, Enterprise-Scale)

Module Federation Micro-Frontends

Config-Driven UI / SDUI Architecture

SCSS, CSS Modules & CSS-in-JS

Design Systems (Material UI)

AWS & Docker / Kubernetes

CI/CD & Cross-Team API Contracts

WORK EXPERIENCE

Acko General Insurance

Jan 2025 - Present

Software Development Engineer 2 · Bengaluru

- SDUI Config-Driven Component Architecture (React):** Designed and owned the SDUI component model across RSA and PUD -- reusable question engine, garage selection, and slot-booking primitives where flow, variants, and pricing rules ship via backend schema, not code changes. Architecturally equivalent to micro-frontend isolation: new product variants deploy without frontend releases. Patterns adopted as org-wide shared standards; saved ~15+ days of divergent implementations per sprint.
- RSA -- Frontend Performance & Funnel Optimisation:** Introduced BFF (Backend-for-Frontend) layer to consolidate slot, garage, and eligibility APIs into a single pre-composed payload -- eliminated waterfall latency and cut registration time from 12 min to 6 min (-50%). Full RSA frontend: dynamic question engine, Google Maps slot booking, live tracking, Segment analytics, Growthbook feature-flag rollouts. Impact: registrations +91%, support calls -43%.
- PUD -- Pickup & Drop (1,000+ Garages, React SDUI):** Config-driven frontend scaling across multiple service areas with differing pricing, garage steerability (ADSC/non-ADSC), and slot availability rules. Reusable node-based navigation and data-enricher patterns adopted as shared primitives alongside RSA.
- Cross-Team API Contracts & Mentorship:** Led cross-team API contract design across RSA, PUD, and platform teams -- defined input/output schemas before backend implementation, preventing multiple rework cycles. Mentored junior engineers on SDUI component architecture. Cross-team code reviews enforcing frontend performance and maintainability standards.
- Advisor Portal & CES Live Tracking:** Built internal ops admin tool (booking management, field-executive live tracking, job status workflows) and CES real-time tracking UI (Google Maps, Distance Matrix ETA, dynamic status tiles). End-to-end ownership from API contract to production rollout.

Dell Technologies

Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard (Angular + Spring Boot):** Enterprise admin application on PCF cloud-native: Angular + DevExtreme frontend, Spring Boot REST APIs, Layer-7 auth. 50% approval-efficiency gain, \$65M ROI in FY. Owned the full Angular architecture including component patterns, routing, and state management.
- Item Usage Dashboard (Angular + Python Flask):** Angular frontend + Flask REST backend + TLS email notification engine. Reduced manual process intervention by 20%. Backend REST APIs designed for cross-team consumption.
- Eye On Desktop Widget (Electron JS):** Proactive desktop monitoring tool -- reduced issue-identification response time by 35% for Ops and Dev Engineering teams.
- CI/CD & Security Lead:** Owned CI/CD pipelines across DISCP and One Cost -- DevOps coverage 60%→97%; PCF cloud-native vulnerability remediation (60-70%); GitHub Actions and Jenkins pipeline management. Docker and Kubernetes for containerised deployment environments.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence Production

React frontend for AI claims decisioning -- per-rule pass/fail breakdown, supporting evidence display, contra-action flagging. Handler overrides feed back into the model retraining loop. End-to-end ownership from API contract design to production rollout across all claim-handler workflows.

DELL Supply Chain Optimisation using QUBO Patent Authorised

Adiabatic Quantum Optimisation applied to procurement backlog -- joint optimisation of Net MRP, demand forecast, and inventory. Patent authorised: TIDE Hack2Evolve (Gen AI for Code Reusability & Sustainability).

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min

4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG), Angular (3 yrs), TypeScript, JavaScript ES6+, SCSS, CSS Modules, CSS-in-JS, Material UI, Design Systems, HTML5, Electron JS

Architecture: Module Federation Micro-Frontends, Config-Driven UI (SDUI), BFF Pattern, RESTful APIs, Microservices

Backend: Java, Spring Boot, Python (Flask), Node.js Databases: MongoDB, Oracle, SQL

Cloud & DevOps: AWS, Docker, Kubernetes, PCF (cloud-native), CI/CD (GitHub Actions, Jenkins), Git

Analytics & Testing: Segment (product instrumentation), Growthbook (A/B testing & feature flags), Google Maps API

Bundlers & Tools: Webpack, Vite, JIRA, Figma
