PROFESSIONAL SUMMARY

React developer with ~5 years of end-to-end frontend ownership across Insurtech and enterprise tech. Deep expertise in React and Angular SDUI component architectures, Redux state management, TypeScript, and RESTful API integration. Track record of shipping high-impact user-facing products: +91% app registrations on RSA, -43% support calls on Pickup & Drop, real-time tracking UIs adopted across all claim workflows. Writes clean, responsive, cross-browser-compatible JavaScript with strong attention to user experience and code reuse.

CORE COMPETENCIES

React JS & React Hooks

Redux State Management

TypeScript / JavaScript ES6+

SDUI Component Architecture

RESTful API Integration

Responsive & Cross-browser UI

HTML5 / CSS3

Git & CI/CD

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Bengaluru

- RSA - Roadside Assistance Platform (React + SDUI):** Owned the complete React frontend: config-driven question engine, dynamic slot booking, Google Maps location handling, garage selection, custodian flow, review screen, and live tracking. Impact: registrations 18% to 34.5% (+91%), registration time -50%, weekly support calls -43%. Built Advisor Portal - internal ops tool for human agents to manage RSA bookings and live-track field executives end-to-end.
- PUD - Pickup & Drop (React SDUI, 1,000+ Garages):** SDUI config-driven React frontend - garage selection, dynamic slot booking with ADSC/non-ADSC bias logic, free/paid pricing by pin code, real-time status polling. Built reusable node-based navigation and data-enricher components adopted as shared primitives across RSA and PUD. Growthbook feature-flag rollouts and Segment analytics instrumented throughout.
- CES Live Tracking & Claim Timeline (React):** Real-time field-executive tracking UI: Google Maps route visualisation, ETA via Distance Matrix API, dynamic status titles, feature-flag-controlled rollout. Claim Timeline: SLA tags (On Time / At Risk / Breached), task-history navigation, IST date formatting - adopted across all claim-handler workflows.
- Admissibility AI Agent - Frontend Layer:** Built the complete React recommendation display layer: AI verdict per-rule pass/fail breakdown, supporting evidence, and contrary-action flagging UI (handler overrides feed back into model retraining). Segment tracking and Growthbook rollout across all claims handler workflows.
- Cross-team & Mentorship:** Stabilised Self PI flow (fallbacks, re-upload, Segment tracking); completion 70-72%. Mentored junior engineers on RSA fast-follower features and SDUI patterns; led API contract design and cross-team code reviews.

Dell Technologies Aug 2021 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard (Angular + DevExtreme):** Full Angular frontend with DevExtreme data grid - complex procurement approval workflows, Layer-7 auth integration, PCF production deployment. 50% approval-efficiency gain on \$65M spend.
- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool for OPs and Dev Engineering - cross-platform desktop UI, reduced issue-identification response time by 35%.
- Buddy Board (Angular + Python):** Automated data-validation and status dashboard for DISCP procurement - eliminated manual data-entry errors across workflows.
- Item Usage Dashboard (Angular + Flask Mail):** TLS email engine - reduced manual process intervention by 20%.

KEY PROJECTS

Speech-to-Sign Language Translator JavaScript / NLP

End-to-end system interpreting grammatical sentence structure for precise Sign Language output - from speech recognition to gesture sequence mapping.

DELL Supply Chain Optimisation using QUBO Quantum ML

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory, significantly reducing logistics costs.

EDUCATION

B.Tech - Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised - DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place - GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min for large data files

4th Place - Ackathon 2024, ACKO · Acko Global Care - AI-powered medical tourism platform

Debashish Chatterjee Award · Highest marks in Computer Science

TECHNICAL SKILLS

Frontend: React JS, React Hooks, Redux, Angular (3 yrs), TypeScript, JavaScript ES6+, HTML5, CSS3, Material UI, Electron JS

Architecture: SDUI (Server-Driven UI), BFF Pattern, Component Architecture, Micro-frontends, Responsive Design

API & Integration: RESTful APIs, Node.js, Spring Boot, Webpack, Babel, ESLint DevOps & Cloud: Git, CI/CD, Docker, Kubernetes, PCF

Analytics & Tools: Segment, Growthbook, Google Maps API, JIRA, Figma Databases: MongoDB, Oracle, SQL
