PROFESSIONAL SUMMARY

Full-stack AI engineer with production LLM systems and agentic pipelines shipped at Acko General Insurance -- autonomous claims decisioning, multi-stage LLM medical analytics, and AI-driven feature rollouts. Python web APIs (Flask, FastAPI) and Spring Boot backends in production across Insurtech and enterprise. React and Angular SDUI architectures at scale. Targeting Lead AI engineering roles where I can build intelligent analytics solutions end-to-end -- from LLM orchestration layer to production frontend.

CORE COMPETENCIES

LLM Engineering & Prompt Engineering

Python (Flask, FastAPI, ML Pipelines)

Agentic System Design

React + Angular (3yr Enterprise)

Spring Boot & REST API Design

Docker + Kubernetes

CI/CD & DevOps

Production AI Systems

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 -- AI-Enabled · Bengaluru

- Admissibility AI Agent:** Architected an agentic claims intelligence system -- event-trigger ingestion, LLM context building, ML cross-reference of damage reports with incident descriptions, configurable rule-engine orchestration, and autonomous classification (admissible / fraudulent / doc-deficient / manual-review) with full decision audit trail.
- Acko Global Care (LLM Pipeline):** Built end-to-end multi-stage AI analytics pipeline -- LLM-based diagnosis extraction from medical reports, optimal hospital and specialist recommendation, treatment cost estimation, and best-doctor ranking. Designed prompt schemas and structured output validation to control hallucination rate before production launch.
- Owned RSA full-stack: Spring Boot BFF APIs and Angular/React SDUI frontend -- dynamic question engine, slot booking, live tracking, Google Maps integration. Impact: registrations 18% to 34.5% (+91%), registration time -50%, weekly support calls 350 to 200 (-43%).
- Built CES Claim Timeline and Audit Trail -- SLA tags (On Time / At Risk / Breached), task-history navigation, IST date formatting -- adopted as the decision-memory substrate across all claim-handler workflows.
- Engineered PUD SDUI config-driven frontend for 1,000+ garages; led API contract design and cross-team code reviews across RSA, PUD, Claims, and CES product streams.

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Built Flask and FastAPI microservices for internal procurement analytics and automation workflows -- REST APIs consumed by Angular frontends, integrated with Oracle DB and PCF production deployments.
- Unified Cost Management Dashboard:** Angular + DevExtreme + Spring Boot -- 50% approval-efficiency gain, \$65M ROI in FY; Layer-7 auth, PCF deployment.
- Security and DevOps lead: DevOps pipeline coverage 60% to 97%; PCF vulnerability remediation 60-70%; enforced engineering standards across DISCP and One Cost teams.
- Item Usage Dashboard:** Flask email engine (TLS) + Angular -- reduced manual process intervention by 20%.

Dell Technologies Aug 2021 - Feb 2023

Software Engineer 1 · Bengaluru

- Eye on Desktop (Electron JS):** Proactive monitoring widget -- reduced issue-identification response time 35% for OPs and Dev Engineering teams.
- Buddy Board:** Angular + Python + Spring Boot automated data-validation dashboard for procurement -- eliminated manual data-entry errors across DISCP workflows.

Software Engineer Intern -- AI-Enabled · Bengaluru

- **PRISMO and DISCP AI Chatbot** (Rasa NLP, Python, wake-word detection): containerised with Docker and Kubernetes -- 20% interaction efficiency gain; trained on real user conversation data.
- **Speech Recognition Engine**: Custom Python domain model tuned for DELL abbreviations -- 85% accuracy in production transcriptions.

KEY PROJECTS

Acko Global Care -- AI Medical Tourism Platform 4th Place, Ackathon 2025

Multi-stage LLM analytics pipeline for India's medical tourism market: LLM-based diagnosis extraction from patient reports, hospital and specialist ranking, treatment cost estimation, and best-doctor recommendation. End-to-end AI product built and demo'd in 48 hours.
Python, LLM APIs, Prompt Engineering, React, Spring Boot

Gen AI for Code Reusability -- Dell Patent

Authorised patent: AI-driven code reusability and sustainability framework. Applied generative AI to reduce duplicate code patterns across enterprise procurement engineering -- TIDE Hack2Evolve winner.
Generative AI, Python, Enterprise Engineering

Energy Prediction Model -- Robotech Labs (IIT Delhi)

ML regression model forecasting power output for a Combined Cycle Power Plant using AWS IoT sensor data. End-to-end cloud deployment with real-time inference.
Python, Machine Learning, AWS, IoT, Regression

DELL Supply Chain Optimisation using QUBO

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory -- significantly reducing logistics costs.
Python, Quantum Computing, Optimisation

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10 -- First Class with Distinction

ACHIEVEMENTS

Patent Authorised -- DELL · Gen AI for Code Reusability and Sustainability	2024
1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min	2023
4th Place -- Ackathon 2025, ACKO · Acko Global Care -- AI medical tourism platform	2025
Debashish Chatterjee Award · Highest marks in Computer Science	2021

SKILLS

AI / ML: LLM APIs, Prompt Engineering, Rasa NLP, Gen AI, Agentic Systems **Python:** Flask, FastAPI, ML Pipelines, Scripting
Backend: Spring Boot, Node.js, REST APIs, Microservices **Frontend:** React, Angular (3 yrs), TypeScript, JavaScript, SDUI
DevOps: Docker, Kubernetes, PCF, CI/CD, Git, GitHub Actions **Databases:** MongoDB, Oracle, SQL
Analytics: Segment, Growthbook, Google Maps API
