PROFESSIONAL SUMMARY

Senior frontend engineer with 5 years of end-to-end product ownership across Insurtech and enterprise tech. Deep React and Angular SDUI expertise -- architected config-driven, server-driven UI systems across 4 product surfaces at Acko. Consistent track record of shipping measurable outcomes: +91% insurance app registrations, 43% reduction in weekly support calls, \$65M ROI enterprise dashboard. Now targeting frontend engineering roles at product-scale companies where UI complexity and user impact are first-class concerns.

CORE COMPETENCIES

React (2yr Production)

Angular (3yr Enterprise-Scale)

TypeScript + JavaScript

SDUI Architecture

Node.js + REST APIs

State Management & Component Architecture

MongoDB + SQL

Analytics-Driven Feature Rollout

WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 · Bengaluru

- RSA -- Roadside Assistance Platform (React + Angular SDUI):** Owned the complete RSA frontend end-to-end -- dynamic question engine, slot booking, Google Maps location handling, garage selection, custodian flow, review screen, and live field-executive tracking. Impact: app registrations 18% to 34.5% (+91%), registration time 12 min to 6 min (-50%), weekly support calls 350 to 200 (-43%).
- Built Advisor Portal -- internal ops tool enabling human agents to manage RSA bookings, track field executives live, and handle end-to-end request management. Instrumented with Segment analytics and Growthbook feature-flag rollouts.
- PUD -- Pickup and Drop (1,000+ Garages, SDUI / React):** Owned SDUI config-driven PUD frontend -- garage selection, slot booking with dynamic bias, free/paid pricing by pin code, real-time status polling. Built reusable node-based navigation and data-enricher patterns adopted as shared primitives across RSA and PUD.
- CES Live Tracking and Claim Timeline:** Built real-time field-executive tracking UI (Google Maps + route visualisation, ETA via Distance Matrix API) and Claim Timeline (SLA tags, task-history navigation) -- adopted across all claim-handler workflows.
- Led API contract design and cross-team code reviews across RSA, PUD, Claims, and CES; mentored junior engineers on RSA fast-follower features and PUD garage logic.

Dell Technologies Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard:** Angular + DevExtreme data grid + Spring Boot backend -- 50% approval-efficiency gain, \$65M ROI in FY. B2B procurement tool serving finance and procurement teams; Layer-7 auth, PCF production deployment.
- Security and DevOps lead: DevOps pipeline coverage 60% to 97%; PCF vulnerability remediation 60-70%; enforced branching strategy and code-quality standards across DISCP and One Cost teams.
- Item Usage Dashboard:** Angular TLS email engine -- reduced manual process intervention by 20%.

Dell Technologies Aug 2021 - Feb 2023

Software Engineer 1 · Bengaluru

- Eye on Desktop Widget (Electron JS):** Proactive monitoring tool for OPs and Dev Engineering teams -- reduced issue-identification response time by 35%.
- Buddy Board:** Angular + Python + Spring Boot automated data-validation and status dashboard for procurement engineers -- eliminated manual data-entry errors across DISCP workflows.

Dell Technologies Feb 2021 - May 2021

Software Engineer Intern · Bengaluru

- PRISMO and DISCP AI Chatbot (Rasa NLP): containerised with Docker and Kubernetes -- 20% interaction efficiency gain; trained on real user conversation data.
- Speech Recognition Engine: custom Python domain model for DELL abbreviations -- 85% production accuracy.

KEY PROJECTS

RSA Advisor Portal -- Internal Ops Platform

Full-stack ops tool enabling RSA human agents to manage bookings, live-track field executives on Google Maps, update job statuses, and handle end-to-end request management. Reduced weekly support calls from 350 to 200 (-43%). Segment-instrumented with Growthbook feature-flag rollout.

React, Angular, Spring Boot, Google Maps API, Segment, Growthbook

DELL Unified Cost Management Dashboard \$65M ROI

Enterprise Angular + DevExtreme dashboard for procurement cost management across Dell's global supply chain. 50% approval efficiency gain; \$65M ROI in FY. Layer-7 auth, Oracle DB, PCF production deployment.

Angular, DevExtreme, Spring Boot, Oracle DB, PCF, Layer-7 Auth

PUD -- Pickup and Drop SDUI Platform

Config-driven server-driven UI platform for 1,000+ garages. Dynamic slot booking with ADSC/non-ADSC bias, free/paid pricing by pin code, real-time status polling. Reusable node-based navigation patterns adopted as shared primitives across RSA and PUD teams.

React, SDUI, Spring Boot, Google Maps API, Segment

Gen AI for Code Reusability -- Dell Patent

Authorised patent: AI-driven code reusability and sustainability framework. TIDE Hack2Evolve winner -- applied generative AI to reduce duplicate code patterns across enterprise engineering.

Generative AI, Python, Enterprise Engineering

EDUCATION

B.Tech -- Computer Science · [Sikkim Manipal Institute of Technology](#) 2017 - 2021

CGPA: 9.69 / 10 -- First Class with Distinction

ACHIEVEMENTS

Patent Authorised -- DELL · [Gen AI for Code Reusability and Sustainability](#) 2024

1st Place -- GSCM-TECH-A-THON, DELL · [Parquet automation: 8 hrs to 2 min](#) 2023

4th Place -- Ackathon 2025, ACKO · [Acko Global Care -- AI medical tourism platform](#) 2025

Debashish Chatterjee Award · [Highest marks in Computer Science](#) 2021

SKILLS

Frontend: React, Angular (3 yrs), TypeScript, JavaScript, CSS, Material UI, Electron JS **SDUI:** Server-Driven UI (React + Angular), BFF Pattern

Backend: Spring Boot, Node.js, Python (Flask, FastAPI), REST APIs, Microservices **Databases:** MongoDB, Oracle, SQL

DevOps: Docker, Kubernetes, PCF, CI/CD, Git **Analytics:** Segment, Growthbook, Google Maps API, JIRA
