WORK EXPERIENCE

Acko General Insurance Jan 2025 - Present

Software Development Engineer 2 - Full-Stack - Bengaluru

- RSA - Roadside Assistance Platform (Angular + React SDUI):** Full ownership of enterprise-grade Angular/React frontend - dynamic question engine, slot booking, Google Maps integration, live tracking, custodian flow. Spring Boot APIs handling real-time status polling and Distance Matrix ETA computation. Impact: app registrations +91%, registration time -50%, weekly support calls -43%. CES ~90%.
- PUD - Pickup & Drop (1,000+ Garages, Angular SDUI):** Config-driven Angular frontend: garage selection, slot booking with dynamic bias rules, free/paid pricing by pin code, real-time status polling via Spring Boot APIs. Built reusable navigation and data-enricher patterns adopted across multiple product verticals.
- CES Live Tracking & Claim Timeline:** Built real-time tracking UI (Angular + Google Maps): route visualisation, ETA polling, dynamic status updates. Delivered Claim Timeline & Audit Trail with SLA tags (On Time / At Risk / Breached), task-history navigation - adopted across all claim-handler workflows.
- Admissibility AI Agent - Claims Intelligence:** Architected an AI Agent system that auto-analyses claim parameters against configurable rules, classifying claims as admissible, fraudulent, document-deficient, or manual-review - reducing handler decisioning time at scale.
- Stabilised Self PI flow (fallbacks, re-upload handling, Segment tracking); auto-attendance tracking & team analytics APIs; mentored junior engineers on API contracts and Angular architecture.
