PROFESSIONAL SUMMARY

AI Applications engineer with ~5 years building and deploying production NLP and LLM systems. Built an LLM pipeline for medical document understanding (structured JSON extraction, hospital ranking, cost estimation), an ML-powered claims classification agent (configurable rules + NLP cross-reference of incident and damage text), and a custom speech recognition model achieving 85% accuracy on domain-specific vocabulary. Full-stack across Python, Spring Boot, React, and Angular -- with production experience in Docker, Kubernetes, CI/CD, and analytics instrumentation (Segment, Growthbook). End-to-end ownership across design, implementation, testing, and on-call -- no handoffs.

CORE COMPETENCIES

LLM Applications (Production)

NLP / Text Classification

Prompt Engineering

Structured JSON Extraction

NER

Python

Spring Boot

Docker / Kubernetes

Data Pipelines

LLM Observability

React / Angular

CI/CD

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 (AI-Enabled) -- Bengaluru

- Admissibility AI Agent (NLP + ML Claims Classification):** Architected an AI system for automated claim analysis -- NLP-powered cross-reference of damage reports and incident descriptions using ML text classification. Classifies each claim as admissible, fraudulent, document-deficient, or manual-review. Configurable rules engine lets non-engineers adjust classification thresholds. Reduced handler decisioning time and improved audit consistency at scale.
- Acko Global Care -- LLM Document Understanding Pipeline (Ackathon 2024, Jan 2025, 4th Place):** Built an LLM pipeline for medical document analysis: structured JSON extraction from unstructured medical reports via prompt engineering -- optimal hospital and specialist recommendation -- treatment cost estimation -- best-doctor ranking. Built end-to-end in a 48hr hackathon sprint.
- RSA -- Roadside Assistance Platform (React + Angular SDUI):** Owned complete RSA frontend and API contracts. Impact: app registrations +91% (18% to 34.5%), registration time -50%, weekly support calls -43%. Segment analytics instrumentation on every user interaction; Growthbook feature-flag rollouts for phased deployment.
- PUD -- Pickup & Drop (1,000+ Garages):** Config-driven SDUI frontend: garage selection, slot booking, real-time status polling. Reusable data-enricher patterns and node-based navigation adopted as shared primitives across RSA and PUD.
- Cross-team API Contracts & Mentorship:** Led API contract discussions across Claims, RSA, and PUD teams. Mentored junior engineers; resolved 30+ portal bugs in 3-4 days. Auto-attendance tracking APIs for Claims handlers.

Dell Technologies Feb 2023 -- Jan 2025

Software Engineer 2 (Promoted from SDE1) -- Security & DevOps Lead -- Bengaluru

- Unified Cost Management Dashboard:** Angular + Spring Boot -- 50% approval-efficiency gain, \$65M ROI tracked in FY, Layer-7 auth, PCF production deployment.
- DevOps Coverage:** Raised DevOps coverage 60% to 97%+. PCF vulnerability remediation 60-70%.

Dell Technologies Aug 2021 -- Feb 2023

Software Engineer 1 -- Bengaluru

- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool -- -35% issue-identification response time.
- Buddy Board:** Angular + Python + Spring Boot automated data-validation dashboard -- eliminated manual data-entry errors across procurement.

Software Engineer Intern (AI-Enabled) -- Bengaluru

- **PRISMO & DISCP AI Chatbot** (Rasa NLP, wake-word detection, Docker + Kubernetes): 20% interaction efficiency gain; trained on real user conversation data.
- **Speech Recognition Engine**: Custom domain-specific model tuned for DELL abbreviations and jargon -- 85% accuracy in production transcriptions. Domain-specific fine-tuning on 500+ real DELL conversations.

PROJECTS

DELL Gen AI -- Code Reusability & Sustainability Patent Authorised

Gen AI system for detecting and suggesting code reuse opportunities across enterprise codebases -- AI-powered code similarity analysis and reuse recommendations.
Gen AI, Python, code analysis

Energy Prediction Model -- Robotech Labs (IIT Delhi)

ML model forecasting power output for a Combined Cycle Power Plant using AWS, IoT sensor data, and regression techniques -- with end-to-end cloud deployment.
Python, ML, AWS, IoT, regression

Speech-to-Sign Language Translator

End-to-end NLP system interpreting grammatical sentence structure for precise Sign Language gesture sequence output.
Python, NLP, speech recognition, gesture mapping

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 -- 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

- Dell Technologies -- Patent Authorised: TIDE Hack2Evolve -- Gen AI for Code Reusability & Sustainability 2024
- Dell Technologies -- 1st Place, GSCM-TECH-A-THON: Parquet automation (8 hrs to 2 min) 2023
- Acko General Insurance -- 4th Place, Ackathon 2024: Acko Global Care (AI-powered medical tourism platform) 2025

SKILLS

AI / NLP / LLM: LLM APIs, Prompt Engineering, RAG, NER, Text Classification, NLP, Rasa, Gen AI, Structured JSON Extraction
Languages: Python, Java, TypeScript, JavaScript **Frontend**: React, Angular (3 yrs), CSS, SDUI, BFF Pattern
Backend: Spring Boot, Node.js, REST APIs, Microservices **DevOps / Cloud**: Docker, Kubernetes, PCF, CI/CD, Git
Data / Analytics: Segment, Growthbook, MongoDB, Oracle, SQL
