PROFESSIONAL SUMMARY

Full-stack engineer with ~5 years of end-to-end delivery at Dell Technologies (enterprise) and Acko General Insurance (insurtech). Deep expertise in React and Angular SDUI architectures, Spring Boot REST APIs, SQL-backed microservices, and enterprise-grade security and DevOps - PCF deployment, Layer-7 auth, DevOps pipeline coverage scaled from 60% to 97%. Shipped production systems serving 1M+ policies and drove \$65M ROI via full-stack ownership from REST API contract design to monitored production rollout. Consistent track record of enterprise integration, CI/CD delivery discipline, and measurable outcomes. Case study: stevens-philip-portfolio.vercel.app

CORE COMPETENCIES

Full Stack Development

REST API Integration & Design

React & Angular (SDUI)

Spring Boot / Java Backend

Enterprise Security & DevOps

SQL & Database Systems

CI/CD & Git Workflows

Microservices & Middleware

WORK EXPERIENCE

Acko General Insurance

Jan 2025 - Present

Software Development Engineer 2 (AI-Enabled) · Bengaluru

- Designed REST API contracts and BFF middleware patterns for cross-team consumption across RSA, PUD, Claims, and CES products - zero breaking changes shipped to production; led API contract discussions and cross-team code reviews.
- RSA Platform (React + Angular SDUI):** Owned full frontend - dynamic question engine, slot booking, Google Maps location handling, live tracking, and Growthbook feature-flag rollouts. Impact: app registrations +91%, registration time -50%, weekly support calls -43%, CES ~90%.
- Admissibility AI Agent:** Architected an ML-based claims classification system that cross-references damage reports with incident descriptions and classifies each claim as admissible, fraudulent, document-deficient, or manual-review - reducing handler decisioning time and improving audit consistency at scale.
- PUD - Pickup & Drop (1,000+ Garages):** Built SDUI config-driven frontend with dynamic garage steerability, slot booking with ADSC bias logic, and reusable node-based navigation primitives adopted as shared patterns across RSA and PUD.
- CES Live Tracking & Claim Timeline:** Real-time field-executive tracking UI - Google Maps, Distance Matrix API for ETA, SLA tags (On Time / At Risk / Breached), task-history navigation; feature-flag-controlled rollout via Growthbook.
- Mentored junior engineers; resolved 30+ portal bugs in 3-4 days; implemented auto-attendance tracking and team analytics APIs for Claims handlers with SQL-backed DB config for timeline event mapping.

Dell Technologies

Feb 2023 - Jan 2025

Software Engineer 2 (Promoted) · Security & DevOps Lead - DISCP & One Cost · Bengaluru

- Enterprise Security & DevOps Lead:** PCF vulnerability remediation 60-70%; CI/CD pipeline coverage scaled from 60% to 97%; Layer-7 auth implementation for PCF production systems.
- Unified Cost Management Dashboard (Angular + Spring Boot):** Full-stack build with DevExtreme - \$65M ROI in FY, 50% approval-efficiency gain, PCF production deployment with Layer-7 auth and SQL-backed data layer.
- Item Usage Dashboard:** Flask Mail + Angular TLS email engine - reduced manual process intervention by 20% across procurement workflows.

Dell Technologies

Aug 2021 - Feb 2023

Software Engineer 1 · Bengaluru

- Buddy Board (Angular + Python + Spring Boot):** Automated data-validation and status dashboard for DISCP procurement - eliminated manual data-entry errors across workflows via REST API and SQL-backed backend.
- Eye On Desktop Widget (Electron JS):** Proactive enterprise monitoring tool - reduced issue-identification response time by 35% for Ops and Dev Engineering teams.

Software Engineer Intern (AI-Enabled) · Bengaluru

- **PRISMO & DISCP AI Chatbot (Rasa NLP):** Containerised with Docker & Kubernetes - 20% interaction efficiency gain; trained on real user conversation data with wake-word detection.
- **Speech Recognition Engine:** Custom domain model tuned for DELL abbreviations - 85% accuracy in production transcriptions.

PROJECTS

DELL Supply Chain Optimisation using QUBO ENTERPRISE

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory - significantly reducing logistics costs at scale.
Python · Optimisation Algorithms · Supply Chain Analytics

Acko Global Care - Ackathon 2024 (4th Place) AI / LLM

End-to-end AI medical tourism platform: LLM-based diagnosis extraction from medical reports, optimal hospital & specialist recommendation, treatment cost estimation, and best-doctor ranking pipeline.
LLM APIs · Python · React · Full Stack

Energy Prediction Model - Robotech Labs (IIT Delhi) ML / CLOUD

ML model forecasting power output for a Combined Cycle Power Plant using IoT sensor data and regression techniques - with end-to-end cloud deployment.
Python · Machine Learning · AWS · IoT Sensors

EDUCATION

B.Tech - Computer Science · Sikkim Manipal Institute of Technology 2017 - 2021
CGPA: 9.69 / 10 · Debashish Chatterjee Award - Highest marks in Computer Science

ACHIEVEMENTS

- Dell Technologies - Patent Authorised: TIDE Hack2Evolve - Gen AI for Code Reusability & Sustainability 2024
- Dell Technologies - 1st Place, GSCM-TECH-A-THON: Parquet automation (8 hrs to 2 min for large data files) 2023
- Acko General Insurance - 4th Place, Ackathon 2024: Acko Global Care (AI-powered medical tourism platform) 2025

SKILLS

Frontend: Angular (3 yrs), React, TypeScript, JavaScript, HTML5, CSS3, Material UI **SDUI:** Server-Driven UI (React + Angular), BFF Pattern
Backend: Spring Boot, Python, Node.js **Integration:** REST APIs, Microservices, Micro-frontends
DevOps: Docker, Kubernetes, PCF, CI/CD, Git **Databases:** MongoDB, Oracle, SQL
AI / ML: Gen AI, LLM APIs, NLP, Rasa, Prompt Engineering **Tools:** Segment, Growthbook, Google Maps API, JIRA, Figma
