PROFESSIONAL SUMMARY

Applied AI Engineer with 5 years shipping production agentic systems and LLM orchestration pipelines. At Acko General Insurance, designed an Admissibility AI Agent implementing Planning and Reflection patterns -- multi-condition rule evaluation with ML-based action classification in production -- and built an end-to-end LLM pipeline for medical diagnosis extraction and specialist recommendation. Python-first AI engineering background, cloud-native deployment (Docker/K8s), and full-stack product ownership across React and Spring Boot. Holds a Dell GenAI patent; 85% accuracy custom Speech Recognition engine. Targeting roles where autonomous agent systems and LLM evaluation drive real product outcomes.

CORE COMPETENCIES

Agentic Workflows (Planning, Reflection)

Multi-Agent Orchestration

LLM API Integration & Prompting

Python AI Engineering

Production Agent Deployment

ML Classification & Evaluation

Cloud-Native Deployment (Docker/K8s)

Full-Stack Product Engineering

WORK EXPERIENCE

Acko General Insurance Jan 2025 – Present

Software Development Engineer 2 — Full-Stack & AI-Enabled · Bengaluru

- Admissibility AI Agent (Planning + Reflection pattern):** Architected a production agentic system that evaluates claim parameters against configurable rule sets, cross-references damage reports with incident descriptions using ML, and classifies each claim as admissible, fraudulent, document-deficient, or manual-review. Multi-condition reasoning with action classification -- directly analogous to ReAct and Planning/Reflection agentic architectures.
- Acko Global Care — LLM Pipeline (Ackathon 2025, 4th Place):** Designed and shipped an end-to-end LLM orchestration pipeline: diagnosis extraction from medical reports via LLM APIs, optimal hospital and specialist recommendation, treatment cost estimation, and ranked best-doctor output. Full lifecycle from prompt design to working demo -- demonstrates multi-step LLM reasoning and structured output engineering.
- AI signal quality & analytics instrumentation:** Implemented Segment analytics and Growthbook feature-flag experimentation across RSA and CES products -- measuring and improving AI-influenced user journeys. Ties to LLM-as-Judge evaluation mindset: instrument, measure, iterate.
- RSA Platform (full-stack ownership, React SDUI):** Owned end-to-end product from API contract to production rollout. App registrations **+91%**, registration time **-50%**, support calls **-43%**. Built reusable SDUI component library adopted across RSA and PUD platforms.
- PUD & CES platforms:** SDUI config-driven PUD (1,000+ garages); CES real-time tracking via Google Maps + Distance Matrix API. Full-stack ownership across both.
- Cross-team mentoring:** Mentored junior engineers; led API contract reviews; resolved 30+ portal bugs in 3-4 days.

Dell Technologies Aug 2021 – Jan 2025

Software Engineer 2 (promoted from SWE1) — Security & DevOps Lead · Bengaluru

- PRISMO & DISCP AI Chatbot (Python + Rasa NLP):** Built NLP chatbot with wake-word detection, containerised with Docker and Kubernetes -- 20% interaction efficiency gain on real user conversation data. Multi-intent classification pipeline in production.
- Speech Recognition Engine (Python):** Custom domain model tuned for DELL abbreviations -- **85% accuracy** in production transcriptions. End-to-end ML model training and deployment.
- Gen AI Patent — TIDE Hack2Evolve:** Authorised patent for Gen AI applied to Code Reusability & Sustainability -- demonstrates novel GenAI solution framing.
- Unified Cost Management Dashboard (Angular + Spring Boot):** **\$65M ROI in FY**, 50% approval-efficiency gain, PCF production deployment. Security & DevOps Lead: coverage **60% to 97%+**.
- GSCM-TECH-A-THON (1st Place):** Parquet automation -- 8 hrs to 2 min for large data files. Fast delivery, high impact.

PROJECTS

DELL Supply Chain Optimisation using QUBO Dell Technologies

Applied Adiabatic Quantum Optimisation to jointly minimise Net MRP, demand forecast, and inventory -- reduced procurement backlog through novel algorithmic approach. Demonstrates capacity to apply non-standard reasoning frameworks to production problems.
Python, QUBO optimisation, supply chain algorithms

Speech-to-Sign Language Translator

End-to-end pipeline: speech recognition, grammatical sentence interpretation, Sign Language gesture sequence mapping. Multi-modal AI pipeline with evaluation across each stage -- mirrors multi-agent evaluation design.
Python, NLP, speech processing, sequence mapping

Energy Prediction Model — Robotech Labs (IIT Delhi)

ML regression model forecasting power output for a Combined Cycle Power Plant -- AWS deployment with IoT sensor data ingestion. End-to-end cloud ML deployment.
Python, AWS, IoT sensors, ML regression, cloud deployment

EDUCATION

B.Tech — Computer Science Sikkim Manipal Institute of Technology 2017 – 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised — Dell Technologies — TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability
4th Place — Ackathon 2025 — Acko Global Care, AI-powered medical tourism platform (LLM pipeline)
1st Place — Dell GSCM-TECH-A-THON — Parquet automation: 8 hrs to 2 min for large data files

SKILLS

AI / ML: Agentic Systems, LLM APIs, Gen AI, NLP, Rasa, Prompt Engineering, ML Classification, Python
Cloud & Infra: Docker, Kubernetes, PCF, AWS (cloud-native), CI/CD, Git **Backend:** Spring Boot, Python, Node.js
Frontend: React, Angular (3 yrs), TypeScript, JavaScript, HTML/CSS
Architecture: Microservices, REST APIs, Server-Driven UI (SDUI), BFF Pattern **Databases:** MongoDB, Oracle, SQL
Analytics & Tools: Segment, Growthbook, JIRA, Figma
