PROFESSIONAL SUMMARY

Staff-calibre Frontend Engineer with 5 years architecting Angular and React SDUI systems at scale. Built and governed shared component libraries adopted across multiple product surfaces at Acko General Insurance, driving a 91% uplift in journey registrations. At Dell, led Angular development for a \$65M-ROI enterprise dashboard and lifted DevOps coverage from 60% to 97%. Brings hands-on AI-assisted development fluency and production AI integration experience -- shipped an AI Agentic claims system and an LLM medical-tourism pipeline end-to-end. Now targeting Staff-level roles where I can set technical direction for frontend architecture and accelerate teams through reusable systems and AI tooling.

CORE COMPETENCIES

Angular & React (5 yrs prod)

Micro-frontend & Monorepo Architecture

Shared Component Library Design

Server-Driven UI (SDUI)

AI-Assisted Development Tooling

CI/CD & Production Deployment

Frontend Technical Leadership

Cross-team Alignment & Mentoring

WORK EXPERIENCE

Acko General Insurance Jan 2025 – Present

Software Development Engineer 2 — Full-Stack & AI-Enabled · Bengaluru

- Shared component library & SDUI architecture:** Built reusable node-based navigation, data-enricher patterns, and garage steerability primitives adopted as shared component library across RSA and PUD platforms -- directly reducing duplication and enabling faster feature delivery across two product surfaces.
- RSA Platform (React SDUI):** Set technical direction for the complete RSA frontend: dynamic question engine, slot booking, live tracking, garage selection, and custodian flow. App registrations **18% to 34.5% (+91%)**, registration time **-50%**, support calls **-43%**. CES ~90%.
- PUD Platform (1,000+ garages):** Owned SDUI config-driven frontend with dynamic ADSC bias, free/paid pricing by pin code, and real-time status polling; primitives reused in RSA.
- AI tooling & AI-native product integration:** Architected Admissibility AI Agent for claims classification using ML rule analysis and incident cross-referencing; built LLM-based medical tourism pipeline (Ackathon 2025, 4th). Demonstrates AI-assisted development at production scale.
- CI/CD & feature-flag rollouts:** Implemented Growthbook feature-flag-controlled rollouts and Segment analytics across RSA and CES; IRDAI-compliant PII relay for production safety.
- Cross-team alignment & mentoring:** Led API contract discussions and cross-team code reviews; mentored junior engineers on RSA fast-follower features and PUD garage logic. Resolved 30+ portal bugs in FFv2 within 3-4 days.

Dell Technologies Aug 2021 – Jan 2025

Software Engineer 2 (promoted from SWE1) — Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard (Angular + Spring Boot):** Architected and delivered enterprise Angular + DevExtreme application with Layer-7 auth and PCF production deployment. **50% approval-efficiency gain, \$65M ROI in FY**. Security & DevOps Lead: coverage **60% to 97%+**. PCF vulnerability remediation 60-70%.
- Item Usage Dashboard (Angular):** Angular + Flask Mail TLS email engine; reduced manual process intervention by 20% across procurement workflows.
- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool -- reduced issue-identification response time by 35% for OPs and Dev Engineering teams.
- Buddy Board (Angular + Python + Spring Boot):** Automated data-validation and status dashboard for DISCP -- eliminated manual data-entry errors across procurement workflows.
- AI Chatbot & Speech Recognition (Intern):** PRISMO & DISCP AI Chatbot (Rasa NLP, Docker/K8s) -- 20% interaction efficiency gain; custom Speech Recognition engine -- **85% domain accuracy**; Gen AI patent authorised (TIDE Hack2Evolve).

PROJECTS

Acko Global Care — AI Medical Tourism Platform Ackathon 2025, 4th Place

End-to-end LLM pipeline: diagnosis extraction from medical reports, hospital and specialist recommendation, cost estimation, and best-doctor ranking. Full-stack ownership from AI pipeline design to product UI -- illustrates AI-native development and tooling fluency.
LLM APIs, Prompt Engineering, React, Spring Boot

DELL Supply Chain Optimisation using QUBO Dell Technologies

Applied Adiabatic Quantum Optimisation to jointly minimise Net MRP, demand forecast, and inventory -- reduced procurement backlog and logistics costs through algorithmic systems thinking at scale.
Python, QUBO optimisation, supply chain algorithms

Speech-to-Sign Language Translator

End-to-end system from speech recognition pipeline to grammatical sentence interpretation and gesture sequence mapping -- demonstrates cross-domain engineering depth and accessibility focus.
NLP, speech processing, sequence mapping

EDUCATION

B.Tech — Computer Science Sikkim Manipal Institute of Technology 2017 – 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

- Patent Authorised — Dell Technologies — TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability
- 1st Place — Dell GSCM-TECH-A-THON — Parquet automation: 8 hrs to 2 min for large data files
- 4th Place — Ackathon 2025 — Acko Global Care, AI-powered medical tourism platform

SKILLS

Frontend: Angular (3 yrs), React, TypeScript, JavaScript, HTML/CSS, jQuery, Material UI
Architecture: Micro-frontends, Server-Driven UI (SDUI), BFF Pattern, Monorepo tooling (NX-compatible), REST APIs
Backend: Spring Boot, Python, Node.js **AI / ML:** Gen AI, LLM APIs, NLP, Rasa, Prompt Engineering, AI-Assisted Dev
DevOps & Cloud: Docker, Kubernetes, PCF, CI/CD, CDN Deployment, Git **Databases:** MongoDB, Oracle, SQL
Analytics & Tools: Segment, Growthbook, Google Maps API, JIRA, Figma
