

Stevens Philip

9380546501 | stevensp99@gmail.com | linkedin.com/in/stevens-philip | Bengaluru, India

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5 years building production-grade React and Angular applications at scale. Deep expertise in server-driven UI (SDUI) architecture and reusable component systems -- shipped RSA and PUD platforms at Acko General Insurance serving high-traffic user flows, cutting registration latency 50% and driving a 91% uplift in journey starts. Brings frontend security experience (IRDAI-compliant PII masking, feature-flag-controlled rollouts), rigorous testing and debugging discipline, and a cross-functional collaboration track record. Integrates AI-native development tools into daily workflow and has shipped production AI features end-to-end.

CORE COMPETENCIES

React & TypeScript

Server-Driven UI (SDUI)

Reusable Component Systems

Frontend Reliability at Scale

Performance Optimization

Production Debugging & Testing

Frontend Security & Compliance

Cross-functional Collaboration

WORK EXPERIENCE

Acko General Insurance

Jan 2025 – Present

Software Development Engineer 2 — Full-Stack & AI-Enabled · Bengaluru

- RSA Platform (React SDUI):** Owned complete frontend -- dynamic question engine, slot booking, Google Maps live tracking, garage selection, and custodian flow. App registrations **18% to 34.5% (+91%)**, registration time **12 min to 6 min (-50%)**, weekly support calls **-43%**. Journey completion 43-47%, CES ~90%.
- Reusable component systems:** Built node-based navigation, data-enricher patterns, and garage steerability primitives adopted as shared SDUI library across RSA and PUD platforms; reduced duplication across two product surfaces.
- Frontend security & compliance:** Engineered IRDAI-compliant PII-masked phone relay across RSA and CES; implemented Growthbook feature-flag-controlled rollouts for safe production releases.
- CES Live Tracking:** Built real-time field-executive tracking UI using Google Maps + Distance Matrix API -- ETA rendering, dynamic status tiles, SLA tags (On Time / At Risk / Breached). Adopted as standard across all claim-handler workflows.
- PUD Platform (1,000+ garages):** Owned SDUI config-driven PUD frontend with dynamic ADSC/non-ADSC bias, free/paid pricing by pin code, and real-time status polling; contributed shared primitives reused in RSA.
- Admissibility AI Agent:** Architected AI agentic system for claims classification (admissible / fraudulent / doc-deficient / manual-review) using ML rule analysis and incident-description cross-referencing -- demonstrated AI-native product integration in production.
- Debugging & quality:** Resolved 30+ portal bugs in FFv2 within 3-4 days; stabilised Self PI flow (fallbacks, re-upload handling, Segment tracking), lifting completion to 70-72%.
- Mentoring:** Mentored junior engineers on RSA fast-follower features and PUD garage logic; led API contract discussions and cross-team code reviews.

Dell Technologies

Aug 2021 – Jan 2025

Software Engineer 2 (promoted from SWE1) — Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard:** Angular + Spring Boot + DevExtreme; Layer-7 auth + PCF production deployment. **50% approval-efficiency gain, \$65M ROI in FY.** Security & DevOps coverage lifted from 60% to 97%+.
- Item Usage Dashboard:** Angular + Flask Mail TLS email engine -- reduced manual process intervention by 20% across procurement workflows.
- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool for OPs and Dev Engineering teams -- reduced issue-identification response time by 35%.
- PRISMO & DISCP AI Chatbot:** Rasa NLP + wake-word detection, containerised with Docker and Kubernetes -- 20% interaction efficiency gain on real-user conversation data.
- Speech Recognition Engine:** Custom domain model tuned for DELL abbreviations -- **85% accuracy** in production transcriptions.

Software Engineer Intern — AI-Enabled · Bengaluru

- Built Buddy Board (Angular + Python + Spring Boot): automated data-validation dashboard for DISCP that eliminated manual data-entry errors across procurement workflows.

PROJECTS

Acko Global Care — AI Medical Tourism Platform Ackathon 2025, 4th Place

End-to-end AI pipeline: LLM-based diagnosis extraction from medical reports, optimal hospital and specialist recommendation, treatment cost estimation, and best-doctor ranking. Full-stack ownership from AI pipeline to product UI -- demonstrates AI-native development fluency.

LLM APIs, Prompt Engineering, React, Spring Boot

DELL Supply Chain Optimisation using QUBO Dell Technologies

Applied Adiabatic Quantum Optimisation to jointly minimise Net MRP, demand forecast, and inventory -- reduced procurement backlog and associated logistics costs significantly through algorithmic systems thinking.

Python, QUBO, supply chain algorithms

Speech-to-Sign Language Translator

End-to-end system interpreting grammatical sentence structure for precise Sign Language output -- from speech recognition pipeline to gesture sequence mapping. Demonstrates cross-domain reliability engineering and systems design.

NLP, speech processing, sequence mapping

EDUCATION

B.Tech — Computer Science Sikkim Manipal Institute of Technology

2017 – 2021

CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised — Dell Technologies — TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability

1st Place — Dell GSCM-TECH-A-THON — Parquet automation: 8 hrs to 2 min for large data files

4th Place — Ackathon 2025 — Acko Global Care, AI-powered medical tourism platform

SKILLS

Frontend: React, Angular (3 yrs), TypeScript, JavaScript, HTML/CSS, Material UI

Architecture: Server-Driven UI (SDUI), BFF Pattern, Micro-frontends, Microservices, REST APIs **Backend:** Spring Boot, Python, Node.js

AI / ML: Gen AI, LLM APIs, NLP, Rasa, Prompt Engineering **DevOps & Cloud:** Docker, Kubernetes, PCF, CI/CD, Git

Databases: MongoDB, Oracle, SQL **Analytics & Tools:** Segment, Growthbook, Google Maps API, JIRA, Figma
