PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5 years building production-grade React and Angular consumer applications at scale. At Acko General Insurance, owned the complete frontend for RSA and PUD platforms -- delivering 91% more journey starts and 50% faster registration -- and shipped CES real-time tracking serving production traffic. Strong GraphQL and REST API integration background; extensive experience consuming microservice APIs across transactional user flows. Brings mentoring depth, a full-development-lifecycle track record, and measurable business impact to every team. Holds a Dell patent in Gen AI and has shipped production AI features end-to-end.

CORE COMPETENCIES

React & Redux

GraphQL & REST API Integration

Consumer-facing Frontend at Scale

Frontend Platform Components

TypeScript & JavaScript (5 yrs)

Performance Optimization

Mentoring & Code Quality

Cross-functional Collaboration

WORK EXPERIENCE

Acko General Insurance

Jan 2025 – Present

Software Development Engineer 2 — Full-Stack & AI-Enabled · Bengaluru

- RSA Platform (React SDUI, consumer-facing):** Owned complete frontend for Roadside Assistance -- dynamic question engine, slot booking, Google Maps live tracking, garage selection, and custodian flow consuming microservice APIs. App registrations **+91%**, registration time **-50%**, support calls **-43%**. Journey completion 43-47%, CES ~90%.
- Frontend platform components:** Built reusable node-based navigation, data-enricher patterns, and garage steerability primitives adopted as shared component library across RSA and PUD -- accelerated feature delivery across two product surfaces.
- CES Live Tracking (real-time, consumer-facing):** Built real-time field-executive tracking UI using Google Maps + Distance Matrix API -- ETA rendering, dynamic status tiles, SLA tags. Consumed microservice APIs for live position updates at production scale.
- PUD Platform (1,000+ garages, consumer-facing):** SDUI config-driven frontend with dynamic pricing by pin code, real-time status polling, and garage steerability logic; REST API integration across garage selection and booking services.
- API definition and design:** Led API contract discussions across frontend, backend, and mobile teams for RSA and PUD; implemented BFF pattern for efficient data aggregation across microservices.
- Mentoring and code quality:** Mentored junior engineers on RSA and PUD features; led cross-team code reviews; resolved 30+ portal bugs in FFv2 in 3-4 days; stabilised Self PI flow (completion 70-72%).
- Production AI features:** Architected Admissibility AI Agent (ML claims classification) and built Acko Global Care LLM pipeline (Ackathon 2025, 4th) -- demonstrates full-lifecycle ownership of AI-enabled consumer products.

Dell Technologies

Aug 2021 – Jan 2025

Software Engineer 2 (promoted from SWE1) — Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard (Angular + Spring Boot):** Enterprise frontend with Layer-7 auth and PCF production deployment. **50% approval-efficiency gain, \$65M ROI in FY.** Security & DevOps Lead: coverage **60% to 97%+.**
- Item Usage Dashboard (Angular):** Angular + Flask Mail TLS engine -- reduced manual process intervention by 20%; full development lifecycle from design to production.
- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool -- reduced issue-identification time by 35% for OPs and Dev Engineering teams.
- AI Chatbot & Speech Recognition:** PRISMO AI Chatbot (Rasa NLP, Docker/K8s) -- 20% interaction efficiency gain; Speech Recognition engine -- **85% accuracy**; Gen AI patent authorised.

PROJECTS

Acko Global Care — AI Medical Tourism Platform Ackathon 2025, 4th Place

End-to-end consumer-facing AI platform: LLM-based diagnosis extraction, hospital and specialist recommendation, treatment cost estimation, best-doctor ranking. Full ownership from API design to product UI -- illustrates consumer product thinking at its core.

LLM APIs, React, Spring Boot, REST microservices

DELL Supply Chain Optimisation using QUBO Dell Technologies

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory -- significant cost reduction through algorithmic problem solving.

Python, QUBO, supply chain algorithms

Speech-to-Sign Language Translator

End-to-end pipeline from speech recognition to grammatical sentence interpretation and Sign Language gesture sequence mapping -- demonstrates full development lifecycle across multiple technical domains.

NLP, speech processing, sequence mapping

EDUCATION

B.Tech — Computer Science Sikkim Manipal Institute of Technology

2017 – 2021

CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised — Dell Technologies — TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability

1st Place — Dell GSCM-TECH-A-THON — Parquet automation: 8 hrs to 2 min for large data files

4th Place — Ackathon 2025 — Acko Global Care, AI-powered medical tourism platform

SKILLS

Frontend: React, Angular (3 yrs), TypeScript, JavaScript, HTML/CSS, Redux, Material UI

APIs & Architecture: GraphQL, REST, Microservices, BFF Pattern, Server-Driven UI (SDUI), Micro-frontends

Backend: Spring Boot, Python, Node.js **AI / ML:** Gen AI, LLM APIs, NLP, Rasa, Prompt Engineering

DevOps & Cloud: Docker, Kubernetes, PCF, CI/CD, Git **Databases:** MongoDB, Oracle, SQL

Analytics & Tools: Segment, Growthbook, Google Maps API, JIRA, Figma
