PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5 years building production-grade React, TypeScript, and Node.js applications end-to-end. At Acko General Insurance, owned complex user-facing features from API contract design to production rollout -- driving a 91% uplift in RSA journey registrations and a 50% drop in processing time. Proven prototype-to-production velocity: built and demoed an end-to-end LLM pipeline at hackathon pace, and automated an 8-hour data process to 2 minutes (Dell 1st place). Strong code review culture, cross-functional delivery track record, and IRDAI-compliant security implementation experience. Excited to apply this full-stack ownership to developer tools at scale.

CORE COMPETENCIES

React & TypeScript

Node.js & Full-Stack Ownership

Rapid Prototyping & Delivery

API Design & Integration

SDUI & Component Architecture

Production Debugging & Code Reviews

Frontend Security & Compliance

Cross-functional Collaboration

WORK EXPERIENCE

Acko General Insurance Jan 2025 – Present

Software Development Engineer 2 — Full-Stack · Bengaluru

- RSA Platform (React + TypeScript SDUI):** Owned complete user-facing frontend from API contract to prod rollout -- dynamic question engine, slot booking, Google Maps live tracking, garage selection, and custodian flow. App registrations **+91%**, registration time **-50%**, support calls **-43%**. Journey completion 43-47%, CES ~90%.
- Rapid prototype delivery:** Built Acko Global Care end-to-end (LLM pipeline + product UI) from concept to working demo under Ackathon hackathon constraints (4th place). Demonstrates prototype-to-production velocity across the full stack.
- Reusable component systems:** Built node-based navigation, data-enricher patterns, and garage steerability primitives adopted as shared SDUI library across RSA and PUD -- accelerated feature delivery across two product surfaces and reduced duplication.
- API design & integration:** Led API contract discussions across frontend, backend, and mobile teams for RSA and PUD; implemented BFF pattern to aggregate microservice data efficiently. Designed auto-attendance tracking & team analytics APIs for Claims handlers.
- Frontend security & compliance:** Engineered IRDAI-compliant PII-masked phone relay; Growthbook feature-flag-controlled rollouts for safe production releases; Segment analytics instrumentation across CES and RSA.
- CES Live Tracking & PUD Platform:** Real-time tracking UI (Google Maps + Distance Matrix API, SLA tags); SDUI PUD with 1,000+ garages and dynamic pricing. End-to-end ownership on both.
- Code reviews & mentoring:** Led cross-team code reviews; mentored junior engineers on RSA and PUD features; resolved 30+ portal bugs in FFv2 in 3-4 days. Stabilised Self PI flow to 70-72% completion.

Dell Technologies Aug 2021 – Jan 2025

Software Engineer 2 (promoted from SWE1) — Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard (Angular + Spring Boot):** Enterprise application with Layer-7 auth and PCF production deployment. **50% approval-efficiency gain, \$65M ROI in FY.** Security & DevOps Lead: coverage lifted **60% to 97%+**; PCF vulnerability remediation 60-70%.
- Item Usage Dashboard (Angular + Flask Mail TLS):** End-to-end delivery from design to production -- reduced manual process intervention by 20%.
- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool -- reduced issue-identification response time by 35% for OPs and Dev Engineering teams.
- AI Chatbot & Speech Recognition:** PRISMO AI Chatbot (Rasa NLP, Docker/K8s, 20% efficiency gain); Speech Recognition engine (85% domain accuracy); Gen AI patent authorised (TIDE Hack2Evolve).
- GSCM-TECH-A-THON (1st Place):** Parquet automation -- reduced processing from 8 hrs to 2 min. Fast delivery, high impact.

PROJECTS

Acko Global Care — AI Medical Tourism Platform Ackathon 2025, 4th Place

End-to-end prototype built under hackathon constraints: LLM-based diagnosis extraction, hospital and specialist recommendation, treatment cost estimation, and ranked best-doctor output. Full-stack ownership from backend pipeline to product UI -- demonstrates rapid prototype delivery across the stack.

LLM APIs, React, Spring Boot, REST microservices

DELL Supply Chain Optimisation using QUBO Dell Technologies

Applied Adiabatic Quantum Optimisation to jointly minimise Net MRP, demand forecast, and inventory -- reduced procurement backlog and logistics costs. Demonstrates first-principles problem solving beyond standard frameworks.

Python, QUBO optimisation, supply chain algorithms

Speech-to-Sign Language Translator

End-to-end pipeline from speech recognition to grammatical sentence interpretation and Sign Language gesture sequence mapping -- cross-domain engineering across multiple technical layers.

NLP, speech processing, sequence mapping

EDUCATION

B.Tech — Computer Science Sikkim Manipal Institute of Technology

2017 – 2021

CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised — Dell Technologies — TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability

1st Place — Dell GSCM-TECH-A-THON — Parquet automation: 8 hrs to 2 min

4th Place — Ackathon 2025 — Acko Global Care, AI-powered medical tourism platform

SKILLS

Frontend: React, Angular (3 yrs), TypeScript, JavaScript, HTML/CSS, Material UI Backend: Node.js, Spring Boot, Python

Architecture: Server-Driven UI (SDUI), BFF Pattern, Microservices, REST APIs, Micro-frontends

AI / ML: Gen AI, LLM APIs, NLP, Rasa, Prompt Engineering DevOps & Cloud: Docker, Kubernetes, PCF, CI/CD, Git

Databases: MongoDB, Oracle, SQL Analytics & Tools: Segment, Growthbook, Google Maps API, JIRA, Figma
