PROFESSIONAL SUMMARY

AI-native full-stack builder with 5 years of end-to-end product ownership - from discovery and prototyping to production adoption at scale. Shipped 3 AI systems at Acko: an ML claims classification agent (fraud/admissibility decisioning at scale), a 0→1 LLM medical tourism pipeline, and an AI-powered roadside assistance platform (+91% app registrations, -50% registration time). Holds a Gen AI patent at Dell. React + Angular SDUI specialist with Spring Boot backend fluency - flexes between frontend and backend based on what the problem needs. Uses AI agents and LLM APIs as the primary build layer, not an afterthought.

CORE COMPETENCIES

AI-Native Product Engineering

End-to-End Feature Ownership

React + Angular SDUI

0→1 Product Development

LLM & AI Agent Systems

Customer-Backward Thinking

Spring Boot & REST APIs

CI/CD & DevOps

WORK EXPERIENCE

Acko General Insurance

Jan 2025 - Present

Software Development Engineer 2 - AI-Enabled · Bengaluru

- Admissibility AI Agent (0→1):** Architected and shipped an AI agentic system that auto-analyses claim parameters against configurable rules, cross-references damage reports with incident descriptions using ML, and classifies each claim as admissible, fraudulent, document-deficient, or manual-review - eliminating handler decisioning time at scale.
- Acko Global Care - Ackathon 2025 (4th Place):** Built a 0→1 LLM-powered medical tourism platform end-to-end: LLM-based diagnosis extraction from medical reports → hospital & specialist recommendation → treatment cost estimation → best-doctor ranking. Full AI pipeline scoped, designed, and shipped within the hackathon window.
- RSA Platform (React + Angular SDUI):** Owned the complete Roadside Assistance frontend and backend - dynamic question engine, slot booking, Google Maps location handling, garage selection, live tracking, and Advisor Portal for ops teams. Impact: app registrations +91% (18% → 34.5%), registration time -50% (12 → 6 min), support calls -43% (350 → 200/week), CES ~90%.
- PUD Platform (SDUI / React, 1,000+ Garages):** Owned SDUI config-driven frontend for pickup & drop: garage selection, dynamic slot booking bias (ADSC vs non-ADSC), free/paid pricing by pin code, real-time status polling. Built reusable node-based navigation and data-enricher patterns adopted as shared primitives.
- CES Live Tracking & Claim Timeline:** Built real-time field-executive tracking UI (Google Maps + Distance Matrix API), SLA audit trail (On Time / At Risk / Breached), Segment analytics, and Growthbook feature-flag rollouts - adopted across all claim-handler workflows.
- Implemented auto-attendance tracking & team analytics APIs; resolved 30+ portal bugs in 3-4 days; mentored junior engineers; led API contract discussions and cross-team code reviews.

Dell Technologies

Feb 2023 - Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Unified Cost Management Dashboard:** Scoped, architected, and shipped an Angular + DevExtreme + Spring Boot procurement dashboard from 0→1 - \$65M ROI in FY, 50% approval-efficiency gain, Layer-7 auth, PCF production deployment. Security & DevOps lead; raised coverage 60% → 97%+.
- Item Usage Dashboard:** Flask Mail + Angular TLS email engine - reduced manual process intervention by 20%.

Dell Technologies

Aug 2021 - Feb 2023

Software Engineer 1 · Bengaluru

- Eye On Desktop Widget (Electron JS):** Proactive monitoring tool - reduced issue-identification response time by 35% for Ops and Dev Engineering teams.
- Buddy Board:** Angular + Python + Spring Boot automated data-validation and status dashboard - eliminated manual data-entry errors across procurement workflows.

Software Engineer Intern - AI-Enabled · Bengaluru

- **PRISMO & DISCP AI Chatbot** (Rasa NLP, wake-word detection): containerised with Docker & Kubernetes - 20% interaction efficiency gain; trained on real user conversation data.
- **Speech Recognition Engine**: Custom domain model tuned for DELL abbreviations - 85% accuracy in production transcriptions.
- **Gen AI Patent (Authorised)**: TIDE Hack2Evolve - Gen AI for Code Reusability & Sustainability. Patent filed and authorised at Dell.

PROJECTS**Admissibility AI Agent - Acko** Production AI System

End-to-end AI agentic system for insurance claims decisioning. Scoped configurable rules engine, cross-references damage reports with incident descriptions via ML, classifies claims across four categories at production scale. Architected from 0→1 - discovery through production rollout.

Python · LLM APIs · ML Classification · Spring Boot · React

Acko Global Care - LLM Medical Tourism Pipeline Ackathon 2025 · 4th Place

0→1 AI platform built end-to-end in a hackathon: LLM-based diagnosis extraction from medical reports, optimal hospital & specialist recommendation, treatment cost estimation, best-doctor ranking. Full discovery-to-demo ownership in a single sprint.

LLMs · Prompt Engineering · Node.js · React

DELL Supply Chain Optimisation using QUBO Research · IIT Delhi

Applied Adiabatic Quantum Optimisation to minimise procurement backlog - jointly optimised Net MRP, demand forecast, and inventory levels. End-to-end model design through cloud deployment on AWS.

Quantum Computing · Python · AWS · IoT

EDUCATION**B.Tech - Computer Science · Sikkim Manipal Institute of Technology**

2017 - 2021

CGPA: 9.69 / 10 · Debashish Chatterjee Award - Highest marks in Computer Science

ACHIEVEMENTS

Patent Authorised - Dell Technologies: Gen AI for Code Reusability & Sustainability (TIDE Hack2Evolve)

1st Place - GSCM-TECH-A-THON, Dell: Parquet automation - 8 hrs → 2 min for large data files

4th Place - Ackathon 2025, Acko: Acko Global Care - AI-powered medical tourism platform

3rd Place - HackerEarth Hackathon v1.0: C++ game, 33 competing teams

SKILLS

Frontend: React, Angular (3 yrs), TypeScript, JavaScript, SDUI, Material UI, Micro-frontends

Backend: Spring Boot, Python, Node.js, REST APIs, BFF Pattern, Microservices

AI / ML: LLM APIs, AI Agents, Gen AI, NLP, Rasa, Prompt Engineering, ML Classification

DevOps & Cloud: Docker, Kubernetes, PCF, CI/CD, Git **Databases**: MongoDB, Oracle, SQL

Analytics: Segment, Growthbook, Google Maps API, Figma
