PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 5 years building highly-scalable Java and React applications end-to-end at Acko General Insurance and Dell Technologies. Delivered a \$65M-ROI enterprise dashboard and drove a 91% uplift in consumer journey registrations through React + Spring Boot full-stack ownership. Strong object-oriented design background, microservices architecture experience, and CI/CD engineering discipline -- lifted DevOps coverage from 60% to 97% at Dell. Consistently ships from concept through production with measurable business outcomes, cross-functional API contract ownership, and a track record of mentoring engineers and driving architectural standards.

CORE COMPETENCIES

Java & Spring Boot

React & TypeScript

Full-Stack Product Ownership

Highly-Scalable Microservices

CI/CD & DevOps Engineering

Cloud Deployment (Docker/K8s/PCF)

Object-Oriented Design & Patterns

Agile Delivery & Cross-team Collaboration

WORK EXPERIENCE

Acko General Insurance Jan 2025 – Present

Software Development Engineer 2 — Full-Stack · Bengaluru

- RSA Platform (React + Spring Boot, full-stack ownership):** Owned complete product frontend and API layer for Roadside Assistance -- dynamic question engine, slot booking, Google Maps live tracking, garage selection, custodian flow. App registrations **+91%**, registration time **-50%**, support calls **-43%**. CES ~90%. Journey completion 43-47%.
- PUD Platform (Spring Boot + React SDUI, 1,000+ garages):** Full-stack ownership of Pickup & Drop -- Java backend APIs for dynamic ADSC/non-ADSC bias and free/paid pricing by pin code; React SDUI config-driven frontend with real-time status polling. Reusable component library adopted across RSA and PUD.
- API design & microservices architecture:** Led API contract discussions across frontend, backend, and mobile teams; implemented BFF pattern for microservice data aggregation; designed auto-attendance tracking and team analytics APIs for Claims handlers.
- CES Live Tracking:** Built real-time field-executive tracking UI (Google Maps + Distance Matrix API, SLA tags On Time / At Risk / Breached) -- adopted across all claim-handler workflows. End-to-end from API design to production rollout.
- Scalable frontend architecture:** Built reusable node-based navigation, data-enricher patterns, and garage steerability primitives adopted as shared SDUI library -- reduced duplication across two product surfaces and accelerated team delivery.
- Mentoring & code quality:** Mentored junior engineers on RSA and PUD features; led cross-team code reviews; resolved 30+ portal bugs in FFv2 in 3-4 days; implemented IRDAI-compliant PII relay and Growthbook feature-flag rollouts.

Dell Technologies Aug 2021 – Jan 2025

Software Engineer 2 (promoted from SWE1) — Security & DevOps Lead · Bengaluru

- Unified Cost Management Dashboard (Java/Spring Boot + Angular):** End-to-end full-stack delivery -- Spring Boot backend, Angular + DevExtreme frontend, Layer-7 auth, PCF production deployment. **50% approval-efficiency gain, \$65M ROI in FY.** CI/CD & DevOps Lead: coverage lifted **60% to 97%+**; PCF vulnerability remediation 60-70%.
- Item Usage Dashboard (Angular + Spring Boot + Flask Mail):** Full-stack development with TLS email engine -- reduced manual process intervention by 20% across procurement workflows.
- Buddy Board (Angular + Python + Spring Boot):** Automated data-validation and status dashboard for DISCP procurement -- eliminated manual data-entry errors across teams. OOP design with Spring Boot service layer.
- Eye On Desktop Widget (Electron JS):** Cross-platform proactive monitoring tool -- reduced issue-identification response time by 35% for OPs and Dev Engineering teams.
- DevOps, CI/CD & cloud infrastructure:** Security Lead across DISCP and One Cost Procurement. Managed PCF production deployments, Git pipeline standards, Maven build automation. DevOps coverage 60% to 97%+ across teams.

Software Engineer Intern · Bengaluru

- Built PRISMO AI Chatbot (Rasa NLP, Docker/K8s) -- 20% interaction efficiency gain; custom Speech Recognition engine -- 85% accuracy.
GSCM-TECH-A-THON 1st place: Parquet automation 8 hrs to 2 min.

PROJECTS**DELL Supply Chain Optimisation using QUBO**

Dell Technologies

Applied Adiabatic Quantum Optimisation to jointly minimise Net MRP, demand forecast, and inventory at enterprise scale -- significantly reduced procurement backlog and associated logistics costs. Demonstrates systems-level thinking for large-scale operational problems.

Python, QUBO optimisation, supply chain algorithms, enterprise scale

Acko Global Care — Medical Tourism Platform

Ackathon 2025, 4th Place

Full-stack platform built end-to-end under hackathon constraints: diagnosis extraction pipeline, hospital and specialist recommendation engine, treatment cost estimation, and ranked best-doctor output. React frontend + Spring Boot API layer -- demonstrates rapid full-stack delivery.

React, Spring Boot, REST APIs, microservices

Speech-to-Sign Language Translator

End-to-end system from speech recognition pipeline to grammatical sentence interpretation and Sign Language gesture sequence mapping -- cross-domain engineering across multiple technical layers with full production deployment.

Python, NLP, speech processing, sequence mapping

EDUCATION**B.Tech — Computer Science** Sikkim Manipal Institute of Technology

2017 – 2021

CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised — Dell Technologies — TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability

1st Place — Dell GSCM-TECH-A-THON — Parquet automation: 8 hrs to 2 min for large data files

4th Place — Ackathon 2025 — Full-stack medical tourism platform, end-to-end delivery under hackathon constraints

SKILLS

Backend: Java, Spring Boot, Python, Node.js, REST APIs, Microservices, Maven

Frontend: React, Angular (3 yrs), TypeScript, JavaScript, HTML/CSS, Material UI

Architecture: Object-Oriented Design, Design Patterns, BFF Pattern, SDUI, Micro-frontends

DevOps & Cloud: Docker, Kubernetes, PCF, CI/CD, Git, Jenkins, CDN Deployment **Databases:** MongoDB, Oracle, SQL

Agile & Tools: Scrum, JIRA, Figma, Segment, Growthbook, Google Maps API
