AI EXPERTISE

- › Admissibility AI Agent — ML-based claims classification (admissible / fraud / doc-deficient / manual)
- › Acko Global Care — LLM diagnosis from medical reports, hospital + doctor recommendations, cost estimation
- › Gen AI Patent @ Dell — Code Reusability & Sustainability with LLM integration
- › DISCP AI Chatbot — Rasa NLP, wake-word detection, Docker + K8s
- › Speech Recognition Engine — 85% accuracy, domain-tuned for DELL abbreviations
- › Energy Prediction ML Model — Combined Cycle Power Plant forecasting

TECHNICAL SKILLS

Frontend

Angular (3 yrs), React, TypeScript, JavaScript, CSS, Material UI

SDUI

Server-Driven UI (React + Angular), BFF Pattern

Backend

Spring Boot, Python, Node.js

AI / ML

Gen AI, LLM APIs, NLP, Rasa, Prompt Engineering

Architecture

Microservices, REST APIs, Micro-frontends

DevOps & Cloud

Docker, Kubernetes, PCF, CI/CD, Git

Databases

MongoDB, Oracle, SQL

Analytics & Tools

Segment, Growthbook, Google Maps API, JIRA, Figma

EDUCATION

B.Tech — Computer Science

Sikkim Manipal Institute of Technology
2017 – 2021

CGPA: 9.69 / 10

ACHIEVEMENTS

▶ Patent Authorised — DELL

TIDE Hack2Evolve: Gen AI for Code Reusability & Sustainability

▶ 1st — GSCM-TECH-A-THON, DELL

Parquet automation: 8 hrs → 2 min for large data files

▶ 4th — Ackathon 2024, ACKO

Acko Global Care: AI-powered medical tourism platform

▶ 3rd — Code-Zen, Coding Ninjas

Competitive coding, Tech ADRISHTA '19

▶ 3rd — Hackathon v1.0, HackerEarth

C++ String Eliminator game, 33 teams

▶ Debashish Chatterjee Award

Highest marks in Computer Science

STEVENS PHILIP

Software Development Engineer 2 · Full-Stack & AI-Enabled Products

PROFILE

Full-stack SDE2 with ~5 years of end-to-end product ownership across Insurtech and enterprise tech. Deep expertise in Angular and React SDUI architectures, AI-enabled backend systems, and high-throughput Spring Boot APIs. Consistent track record of driving measurable business impact — from doubling insurance app registrations to automating claims decisioning with ML. Targeting Senior Full-Stack or AI Software Engineer roles at high-growth, product-led companies.

EXPERIENCE

Software Development Engineer 2 AI-ENABLED

Acko General Insurance · Bengaluru · Jan 2025 – Present

Full-stack ownership across RSA, PUD, Claims & CES using React + Angular SDUI architecture. End-to-end responsibility from API contract design to production rollout.

Admissibility AI Agent — Claims Intelligence

→ Architected an AI Agentic system that auto-analyses claim parameters against configurable rules and cross-references damage reports with incident descriptions using ML.

→ Classifies each claim as admissible, fraudulent, document-deficient, or manual-review — reducing handler decisioning time and improving audit consistency at scale.

Acko Global Care — Ackathon 2024 (4th Place)

→ Built an AI-powered medical tourism platform for India in Acko's internal hackathon.

→ Core AI pipeline: LLM-based diagnosis extraction from medical reports → optimal hospital & specialist recommendation → treatment cost estimation → best-doctor ranking, end-to-end.

RSA — Roadside Assistance Platform (React + Angular SDUI)

→ Owned the complete RSA frontend: dynamic question engine, slot booking, Google Maps location handling, garage selection, custodian flow, review screen, and live tracking.

→ Impact: App registrations 18% → 34.5% (+91%), registration time 12 min → 6 min (–50%), weekly support calls 350 → 200 (–43%). Journey completion 43–47%, CES ~90%.

→ Built Advisor Portal — an internal ops tool for human agents to manage RSA bookings: update job status, live-track field executives, and handle end-to-end RSA request management.

→ Engineered towing eligibility logic, pit/flood routing, PII-masked phone numbers (IRDAI-compliant), Segment analytics, and Growth book feature-flag rollouts.

CES Live Tracking & Claim Timeline

→ Built real-time field-executive tracking UI: Google Maps + route visualisation, ETA via Distance Matrix API, dynamic status titles, feature-flag-controlled rollout.

→ Delivered Claim Timeline & Audit Trail: SLA tags (On Time / At Risk / Breached), task-history navigation, IST date formatting — adopted across all claim-handler workflows.

PUD — Pickup & Drop (1,000+ Garages, SDUI / React)

→ Owned SDUI config-driven PUD frontend: garage selection, slot booking with dynamic bias (ADSC vs non-ADSC), free/paid pricing by pin code, and real-time status polling.

→ Built reusable node-based navigation, data-enricher patterns, and garage steerability logic adopted as shared primitives across RSA and PUD.

Cross-team & Mentorship

→ Stabilised Self PI flow (fallbacks, re-upload handling, Segment tracking); completion 70–72%. Delivered Vahan status, cancelled-policy display, and WhatsApp communication flows.

→ Implemented auto-attendance tracking & team analytics APIs for Claims handlers; DB config for timeline event mapping; resolved 30+ portal bugs in FFv2 in 3–4 days.

→ Mentored junior engineers on RSA fast-follower features and PUD garage logic; led API contract discussions and cross-team code reviews.

Software Engineer 2 (Promoted from SDE1)

Dell Technologies · **Bengaluru** · Feb 2023 – Jan 2025

Security & DevOps Lead — DISCP & One Cost (Procurement). DevOps coverage: 60% → 97%+. PCF vulnerability remediation: 60–70%.

→ Unified Cost Management Dashboard: Angular + DevExtreme + Spring Boot — 50% approval-efficiency gain, \$65M ROI in FY, Layer-7 auth, PCF production deployment.

→ Item Usage Dashboard: Flask Mail + Angular TLS email engine — reduced manual process intervention by 20%.

Software Engineer 1

Dell Technologies · **Bengaluru** · Aug 2021 – Feb 2023

→ Eye On Desktop Widget (Electron JS): proactive monitoring tool — reduced issue-identification response time by 35% for OPs and Dev Engineering teams.

→ Buddy board: Angular + Python + Spring Boot automated data-validation and status dashboard for DISCP — eliminated manual data-entry errors across procurement workflows.

Software Engineer Intern **AI-ENABLED**

Dell Technologies · **Bengaluru** · Feb 2021 – May 2021

→ PRISMO & DISCP AI Chatbot (Rasa NLP, wake-word detection): containerised with Docker & Kubernetes — 20% interaction efficiency gain; trained on real user conversation data.

→ Speech Recognition Engine: custom domain model tuned for DELL abbreviations — 85% accuracy in production transcriptions.

SDE Winter Intern

Bharat Electronics Limited · **Ghaziabad** · Dec 2019 – Jan 2020

→ Radar Console Displays for multi-object tracking — trajectory, distance, and bearing calculations using Qt IDE.

KEY PROJECTS

DELL Supply Chain Optimisation using QUBO

Applied Adiabatic Quantum Optimisation to minimise procurement backlog by jointly optimising Net MRP, demand forecast, and inventory — significantly reducing associated logistics costs.

Speech-to-Sign Language Translator

End-to-end system interpreting grammatical sentence structure for precise Sign Language output — from speech recognition to gesture sequence mapping.

Energy Prediction Model — Robotech Labs (IIT Delhi)

ML model forecasting power output for a Combined Cycle Power Plant using AWS, IoT sensor data, and regression techniques — with end-to-end cloud deployment.
