

Stevens Philip

9380546501 | stevensp99@gmail.com | linkedin.com/in/stevens-philip | stevens-philip-portfolio.vercel.app | Bengaluru, India

PROFESSIONAL SUMMARY

Full-stack SDE2 with ~5 years of end-to-end product ownership across Insurtech and enterprise tech. Deep expertise in React and Angular SDUI architectures, AI-enabled backend systems, and high-throughput Java/Spring Boot APIs. Consistent track record of driving measurable business impact -- from doubling insurance app registrations to automating claims decisioning with ML. Experienced with AWS, Docker, Kubernetes, and CI/CD in production. Targeting Senior Full-Stack or AI Software Engineer roles at high-growth, product-led companies.

CORE COMPETENCIES

React.js & Angular (3 yrs)

Java & Spring Boot (REST APIs)

TypeScript & Python

Next.js (SSR/SSG)

SDUI & BFF Architecture

Module Federation Micro-Frontends

AWS, Docker & Kubernetes

CI/CD & DevOps (GitHub Actions, Jenkins)

AI Agent Pipelines & LLM APIs

SCSS / Tailwind / Styled Components

Redux & State Management

Datadog & Segment (Production)

Cross-Team API Contract Design

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 · Bengaluru

- Admissibility AI Agent -- Claims Intelligence:** Architected an AI agentic system that auto-analyses claim parameters against configurable rules and cross-references damage reports with incident descriptions using ML. Classifies each claim as admissible, fraudulent, document-deficient, or manual-review -- reducing handler decisioning time and improving audit consistency at scale. Built the complete claims handler frontend: AI verdict display, per-rule pass/fail breakdown, supporting evidence, and contrary-action flagging. Handler overrides feed back into the model retraining loop -- a closed human-in-the-loop feedback cycle.
- RSA -- Roadside Assistance Platform (React + Angular SDUI):** Owned the complete RSA frontend: dynamic question engine, slot booking, Google Maps location handling, garage selection, custodian flow, review screen, and live tracking. Built Advisor Portal for internal ops agents to manage bookings and live-track field executives. Impact: App registrations 18%→34.5% (+91%), registration time ~50%, weekly support calls ~43%. CES ~90%.
- PUD -- Pickup & Drop (1,000+ Garages, SDUI / React):** Owned config-driven PUD frontend: garage selection, slot booking with dynamic bias (ADSC vs non-ADSC), free/paid pricing by pin code, real-time status polling. Built reusable node-based navigation and data-enricher patterns adopted as shared primitives across RSA and PUD product lines.
- CES Live Tracking & Claim Timeline:** Built real-time field-executive tracking UI with Google Maps, ETA via Distance Matrix API, and feature-flag-controlled rollout. Delivered Claim Timeline & Audit Trail with SLA tags (On Time / At Risk / Breached) -- adopted across all claim-handler workflows.
- Cross-Team API Contracts, Mentorship & Compliance:** Owned API contract design across RSA, PUD, and platform teams, standardising schemas before backend implementation. Spring Boot BFF layer aggregating multi-source APIs. PII-masked phone numbers (IRDAI-compliant) and Segment analytics + Growthbook feature flags across all product lines. Mentored junior engineers; resolved 30+ portal bugs in FFv2 in 3--4 days.

Dell Technologies Aug 2021 -- Jan 2025

Software Engineer · SDE1 → SDE2 (Promoted) · Bengaluru

- Security & DevOps Lead -- DISCP & One Cost (Procurement) [SDE2]:** Owned security posture and CI/CD pipeline across two product lines. PCF cloud-native vulnerability remediation: resolved 60--70% of open CVEs. DevOps coverage: 60%→97%+. GitHub Actions + Jenkins pipeline ownership; Docker and Kubernetes for containerised deployments.
- Unified Cost Management Dashboard (Angular + Spring Boot + Layer-7 Auth) [SDE2]:** Full-stack enterprise admin on PCF -- Angular frontend, Spring Boot REST APIs, Layer-7 authentication (enterprise SSO), RBAC with approver/viewer/admin separation. 50% approval-efficiency gain, \$65M ROI in FY.
- Item Usage Dashboard (Angular + Python Flask) [SDE2]:** Angular frontend + Flask REST backend + TLS email notification engine -- reduced manual process intervention by 20%.
- Eye On Desktop Widget (Electron JS) [SDE1]:** Proactive monitoring tool -- reduced issue-identification response time by 35% for OPs and Dev Engineering teams.
- Buddy Board (Angular + Python + Spring Boot) [SDE1]:** Automated data-validation and status dashboard for DISCP procurement -- eliminated manual data-entry errors across procurement workflows.

Dell Technologies

Feb 2021 -- May 2021

Software Engineer Intern · Bengaluru

- **PRISMO & DISCP AI Chatbot (Rasa NLP, Docker, Kubernetes):** Containerised NLP chatbot with wake-word detection deployed on Docker/Kubernetes -- 20% interaction efficiency gain; trained on real user conversation data.
- **Speech Recognition Engine:** Custom domain model tuned for Dell abbreviations -- 85% accuracy in production transcriptions.

Bharat Electronics Limited

Dec 2019 -- Jan 2020

SDE Winter Intern · Ghaziabad

- Radar Console Displays for multi-object tracking -- trajectory, distance, and bearing calculations using Qt IDE.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence

AI / Production

End-to-end AI agentic classification pipeline for insurance claims: per-rule pass/fail analysis, supporting evidence display, contra-action flagging, human-override feedback loop into model retraining. Full ownership from API contract to production rollout.

DELL Supply Chain Optimisation using QUBO

Quantum Computing

Adiabatic Quantum Optimisation applied to procurement backlog -- jointly optimising Net MRP, demand forecast, and inventory to significantly reduce associated logistics costs.

Speech-to-Sign Language Translator

End-to-end system interpreting grammatical sentence structure for precise Sign Language output -- from speech recognition to gesture sequence mapping.

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology

2017 -- 2021

CGPA: 9.69 / 10

High School Diploma -- Computer Science · St. Columba's School, New Delhi

2013 -- 2017

Grade: 9.2

ACHIEVEMENTS

Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min

4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform

3rd Place -- Code-Zen, Coding Ninjas · Competitive coding, Tech ADRISHTA '19

3rd Place -- Hackathon v1.0, HackerEarth · C++ String Eliminator game, 33 teams

Debashish Chatterjee Award · Highest marks in Computer Science

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG), Angular (3 yrs), TypeScript, JavaScript ES6+, SCSS, Sass, CSS Modules, CSS-in-JS, Tailwind CSS, Styled Components, Material UI, Design Systems

State Management: Redux

SDUI & Architecture: Server-Driven UI (React + Angular), BFF Pattern, Module Federation Micro-Frontends, Microservices, REST APIs

Backend: Java, Spring Boot (REST APIs, Layer-7 Auth, PCF production), Python (Flask, Rasa NLP), Node.js

Cloud & DevOps: AWS, Docker, Kubernetes, PCF (cloud-native), CI/CD (GitHub Actions, Jenkins), Git

AI / ML: Gen AI, LLM APIs, Rasa NLP, Prompt Engineering, AI Agent Pipelines **Databases:** MongoDB, Oracle, SQL

Analytics & Observability: Datadog (production, Acko), Segment, Growthbook, Google Maps API, JIRA, Figma
