PROFESSIONAL SUMMARY

Full-stack engineer with ~5 years building Java/Spring Boot APIs and React/Angular frontends in production -- with a security and compliance track record. At Dell, served as Security & DevOps Lead: PCF vulnerability remediation (60-70% resolved), Layer-7 authentication systems, CI/CD pipeline ownership (coverage 60%-->97%). At Acko, built AI-driven decisioning pipelines (Admissibility AI Agent: per-rule classification, evidence display, human-override feedback loop) and managed IRDAI-regulated PII handling across 4 product lines. AWS, Docker, Kubernetes, and REST API design in production. Now targeting security platform engineering -- bringing full-stack depth to automated detection, response, and compliance workflows.

CORE COMPETENCIES

Java & Spring Boot (REST APIs, Auth)

React.js & Angular (3 yrs)

TypeScript & Python

AWS, Docker & Kubernetes

CI/CD & Security DevOps

Layer-7 Auth & RBAC Patterns

AI-Driven Decision Pipelines

IRDAI-Compliant Data Handling

Cross-Team API Contract Design

WORK EXPERIENCE

Acko General Insurance Jan 2025 -- Present

Software Development Engineer 2 · Bengaluru

- Admissibility AI Agent -- Claims Intelligence (AI Decision Pipeline):** Architected an AI agentic system classifying claims as admissible, fraudulent, document-deficient, or manual-review -- reducing handler decisioning time at scale. Built React frontend: per-rule pass/fail breakdown, supporting evidence display, contra-action flagging. Handler overrides feed back into the model retraining loop -- a closed feedback cycle directly analogous to automated security detection-response-retraining workflows.
- IRDAI-Compliant Security & Data Handling:** Implemented PII-masked phone numbers and IRDAI-compliant data flows across RSA, PUD, and CES. Segment analytics instrumentation across all product lines with RBAC-controlled access to sensitive claim and user data.
- Cross-Team API Contract Design & BFF Architecture:** Owned API contract design across RSA, PUD, and platform teams -- standardising input/output schemas before backend implementation. Spring Boot BFF layer aggregating multi-source APIs into UI-optimised payloads; AWS-hosted services across product lines.
- RSA & PUD -- Full-Stack SDUI (React + Spring Boot):** Config-driven frontend architecture with Java/Spring Boot backend APIs. Owned complete product lifecycle: API contracts, React SDUI components, Segment/Growthbook instrumentation, production deployment. Impact: +91% registrations, -50% registration time, -43% support calls.

Dell Technologies Aug 2021 -- Jan 2025

Software Engineer 2 (Promoted from SDE1) · Bengaluru

- Security & DevOps Lead -- DISCP & One Cost (Procurement):** Owned security posture and CI/CD pipeline across two product lines. PCF cloud-native vulnerability remediation: resolved 60-70% of open CVEs. DevOps coverage: 60%-->97%. GitHub Actions + Jenkins pipeline ownership. Docker and Kubernetes for containerised deployments.
- Unified Cost Management Dashboard (Spring Boot + Angular + Layer-7 Auth):** Full-stack enterprise admin on PCF: Angular frontend, Spring Boot REST APIs, Layer-7 authentication (enterprise SSO integration). RBAC: approver vs. viewer vs. admin role separation. 50% approval-efficiency gain, \$65M ROI in FY. Directly analogous to building secure internal admin portals for security operations.
- Item Usage Dashboard (Angular + Python Flask):** Angular frontend + Flask REST backend + TLS email notification engine. Reduced manual process intervention by 20%. REST APIs designed for cross-team consumption.
- AI Chatbot & Speech Recognition (Rasa NLP, Docker, Kubernetes):** Containerised NLP chatbot (Rasa) with wake-word detection deployed on Docker/Kubernetes -- 20% interaction efficiency. Speech recognition engine tuned for Dell abbreviations: 85% accuracy. AI pipelines from model to production deployment end-to-end.

KEY PROJECTS

Admissibility AI Agent -- Claims Intelligence AI / Production

AI agentic classification pipeline for insurance claims: per-rule pass/fail, supporting evidence, contra-action flagging, human-override feedback loop into model retraining. End-to-end ownership from API contract to production rollout. Analog to AI-driven automated security detection and response.

DELL Supply Chain Optimisation using QUBO Patent Authorised

Adiabatic Quantum Optimisation applied to procurement backlog -- joint optimisation of Net MRP, demand forecast, and inventory. Patent authorised: TIDE Hack2Evolve (Gen AI for Code Reusability & Sustainability).

EDUCATION

B.Tech -- Computer Science · Sikkim Manipal Institute of Technology 2017 -- 2021
CGPA: 9.69 / 10

ACHIEVEMENTS

Patent Authorised -- DELL TIDE Hack2Evolve · Gen AI for Code Reusability & Sustainability

1st Place -- GSCM-TECH-A-THON, DELL · Parquet automation: 8 hrs to 2 min

4th Place -- Ackathon 2024, ACKO · Acko Global Care -- AI-powered medical platform

TECHNICAL SKILLS

Backend: Java, Spring Boot (REST APIs, Layer-7 Auth, PCF production), Python (Flask, Rasa NLP), Node.js

Frontend: React.js, Next.js (SSR/SSG), Angular (3 yrs), TypeScript, JavaScript ES6+, SCSS, CSS Modules, CSS-in-JS, Material UI

Cloud & DevOps: AWS, Docker, Kubernetes, PCF (cloud-native), CI/CD (GitHub Actions, Jenkins), Git

Security & Observability: Datadog (Acko, production), PCF vulnerability remediation, Layer-7 Auth, IRDAI-compliant PII handling, RBAC patterns, Security DevOps

Architecture: Microservices, REST APIs, BFF Pattern, SDUI, Module Federation Micro-Frontends Databases: MongoDB, Oracle, SQL

AI / ML: Gen AI, LLM APIs, Rasa NLP, Prompt Engineering, AI Agent pipelines

Analytics & Observability: Datadog (production, Acko), Segment, Growthbook, Google Maps API; Prometheus / Grafana (learning)
